WANAI Compact Refrigerator with Inner Freezer 3.2 Cu.Ft - Model WA01502 User Manual

Brand: WANAI | Model: WA01502

Introduction

This manual provides essential information for the safe and efficient operation of your WANAI 3.2 Cu.Ft Compact Refrigerator with Inner Freezer. This unit combines a refrigerator and a freezer compartment, offering versatile storage for various items. It is designed for energy efficiency and quiet operation, making it suitable for bedrooms, dorms, offices, and other small spaces.

Setup Instructions

1. Unpacking and Placement

Carefully remove all packaging materials, including tape and protective films. Place the refrigerator on a flat, stable surface. Ensure there is adequate ventilation around the unit, with at least 4 inches (10 cm) of space on the sides and back for proper airflow. After placement, allow the refrigerator to stand upright for 24 hours before plugging it in. This allows the refrigerant to settle, ensuring optimal performance.

2. Leveling the Unit

Your refrigerator is equipped with adjustable leveling legs. Use these to ensure the unit is stable and perfectly level. Proper leveling helps reduce vibration and noise during operation.

3. Power Connection

Connect the 3-pin (North American Type B) power plug securely into a dedicated 110-volt electrical outlet. Do not use

extension cords or adapters.

Operating Instructions

1. Temperature Control

The refrigerator features a 5-level adjustable thermostat located inside the unit. Setting '1' is the warmest, and '5' is the coldest. The refrigerator compartment maintains temperatures between 32°F (0°C) and 50°F (10°C), while the inner freezer compartment operates between -0.4°F (-18°C) and 32°F (0°C). Adjust the dial to your desired cooling level based on the contents and ambient temperature.

2. Interior Features

The interior is designed for efficient storage:

- **Removable Tempered Glass Shelves:** These shelves can be adjusted or removed to accommodate items of various sizes.
- **Crisper Drawer:** Ideal for keeping fruits and vegetables fresh.
- **Beverage Storage Shelf:** Located on the door for convenient access to drinks.
- **LED Lighting:** An internal LED light provides clear visibility of the contents.

Maintenance

1. Manual Defrosting

The inner freezer compartment features a manual defrost system. When frost accumulates to approximately 1/4 inch (6 mm) thickness, it is time to defrost. To defrost, unplug the refrigerator, remove all food items, and leave the freezer door open to allow the frost to melt naturally. Place towels at the bottom to absorb water. Do not use sharp objects or heating devices to speed up the defrosting process, as this can damage the unit.

2. Cleaning

Regular cleaning helps maintain the refrigerator's efficiency and appearance. Always unplug the unit before cleaning.

- **Interior:** Wipe the interior surfaces, including shelves and the crisper drawer, with a soft cloth dampened with a mild detergent and warm water. Rinse and dry thoroughly.
- **Exterior:** Clean the exterior surfaces with a soft cloth and mild detergent. Avoid abrasive cleaners.
- **Door Seal:** Ensure the removable door seal is clean and free of food particles or debris to maintain an effective seal.

Troubleshooting Guide

Before contacting customer service, please review the following common issues and solutions:

Problem	Possible Cause	Solution
Refrigerator not cooling	Power cord unplugged; Thermostat set too warm; Door not closed properly; Insufficient ventilation.	Ensure power cord is secure. Adjust thermostat to a colder setting. Check door seal and ensure door is fully closed. Provide adequate space around the unit.
Freezer not freezing	Thermostat set too warm for freezer; Overloaded freezer compartment.	Adjust the thermostat to a colder setting (higher number). Avoid placing too many items in the freezer at once to allow for proper airflow.
Excessive noise	Unit not level; Unit touching a wall or object.	Adjust leveling legs to ensure the refrigerator is stable and level. Move the unit away from walls or other objects. Normal operating noise is typically below 38dB.
Water on floor	Drain pan overflowing (during defrost); Door not sealed properly.	Ensure the drain pan is correctly positioned and not full. Check the door seal for proper closure.
