IMEX Click-Clack Valve VCC008 Instruction Manual

Universal Pop-Up Drain Stopper for Sinks and Bidets

INTRODUCTION

Thank you for choosing the IMEX Click-Clack Valve VCC008. This universal pop-up drain stopper is designed for easy installation and reliable operation in both sinks and bidets, with or without an overflow. Crafted from durable brass and Zamak with an electrophoresis matte black finish, it offers a guaranteed opening/closing system for 20,000 cycles.

PRODUCT FEATURES

- Fits all standard sinks and bidets, compatible with or without an overflow system.
- Guaranteed opening/closing mechanism for over 20,000 cycles, ensuring long-term reliability.
- Standard 1 1/4" bottom thread for broad compatibility with plumbing systems.
- Constructed from high-quality brass and Zamak for durability.
- Features an electrophoresis matte black finish for a sleek appearance and enhanced corrosion resistance.
- Designed for quick and straightforward installation.

SETUP AND INSTALLATION

The IMEX Click-Clack Valve VCC008 is designed for quick and easy installation. Please follow these general steps. For specific plumbing configurations, consult a professional plumber.

1. **Prepare the Drain Opening:** Ensure the drain opening in your sink or bidet is clean and free from old sealant or debris.
2. **Disassemble the Valve:** Unscrew the upper part of the click-clack valve from the lower body.
3. **Position the Upper Seal:** Place the upper seal (gasket) onto the top part of the valve and insert it into the drain hole from inside the sink/bidet.
4. **Position the Lower Seal and Body:** From underneath the sink/bidet, place the lower seal (gasket) onto the lower part of the valve body. Thread the lower body onto the upper part, ensuring the seals are correctly seated.
5. **Tighten Securely:** Hand-tighten the assembly, then use a wrench to gently tighten until secure. Do not overtighten, as this can damage the seals or the fixture.
6. **Connect to Plumbing:** Connect the 1 1/4" bottom thread of the valve to your existing P-trap or waste pipe. Ensure

all connections are watertight.

7. **Test for Leaks:** Run water into the sink/bidet and check for any leaks around the drain assembly and plumbing connections.

This diagram illustrates the key dimensions of the IMEX Click-Clack Valve VCC008, including its diameter, height, and thread size, crucial for proper installation and fit.

OPERATING INSTRUCTIONS

The IMEX Click-Clack Valve VCC008 operates with a simple push mechanism:

- **To Close the Drain:** Gently press down on the top of the drain stopper. It will click into the closed position, retaining water in the basin.
- **To Open the Drain:** Press down on the top of the drain stopper again. It will click into the open position, allowing water to drain.

The robust design ensures reliable operation for many years, with a guaranteed lifespan of 20,000 opening and closing cycles.

MAINTENANCE AND CLEANING

Proper maintenance will ensure the longevity and appearance of your IMEX Click-Clack Valve. Follow these steps for cleaning:

1. **Regular Cleaning:** For daily cleaning, use a soft cotton cloth, lightly moistened if necessary. Gently wipe the surface to remove most dirt without damaging the material. Avoid abrasive sponges or brushes.
2. **Removing Limescale:** Limescale deposits often accumulate in corners and crevices. Use a mild, citric acid-based cleaner. Do not spray the concentrate directly onto the valve; instead, apply it to a cloth first.
3. **Cleaning the Stopper Mechanism:** The pop-up stopper mechanism can be easily removed for thorough cleaning. Immerse it in hot water with a small amount of cleaner for about ten minutes to dissolve deposits.
4. **Rinse Thoroughly:** After cleaning, rinse the valve thoroughly with clear water to remove any cleaning agent residue.
5. **Polish:** Repeat the wiping step with a clean, dry cloth to remove any remaining residue and restore a shiny finish to the surface.
6. **Additional Tip:** Clean the sink basin and the drain outlet simultaneously for a sparkling result.

Important: We recommend using mild, citric acid-based cleaning agents. Stronger concentrates can irritate skin and eyes, cause allergies, and damage sensitive surfaces. Always test cleaners on an inconspicuous area first.

TROUBLESHOOTING

If you encounter issues with your IMEX Click-Clack Valve, consider the following common solutions:

- **Leakage Around the Drain:**
 - Check if the seals (gaskets) are correctly positioned and not damaged.
 - Ensure the drain assembly is tightened securely, but do not overtighten.
 - If necessary, disassemble, clean, re-seat seals, and re-tighten. Consider applying plumber's putty or silicone sealant if leaks persist (ensure it's suitable for your fixture material).
- **Stopper Not Opening or Closing Properly:**
 - Remove the pop-up stopper and check for any debris (hair, soap residue) obstructing the mechanism.
 - Clean the stopper mechanism as described in the Maintenance section.
 - Ensure the stopper is correctly seated when reinserted.
- **Slow Drainage:**
 - The most common cause is a clog. Remove the pop-up stopper and clear any visible obstructions.
 - If the clog is further down, you may need to clean the P-trap or use a drain snake.

If these steps do not resolve the issue, please contact customer support or a qualified plumber.

SPECIFICATIONS

Model	VCC008
Brand	IMEX (MICE COLLECTION)
Material	Brass, Zamak
Color	Matte Black
Thread Size	1 1/4"
Compatibility	Universal for sinks and bidets (with or without overflow)
Durability	Guaranteed 20,000 opening/closing cycles
Manufacturer	IMEX PRODUCTS SL

WARRANTY AND SUPPORT

For warranty information, please refer to the terms and conditions provided by your retailer at the time of purchase. IMEX products are manufactured to high-quality standards, and specific warranty details may vary by region or retailer. Should you require technical assistance or have questions not covered in this manual, please contact the retailer from whom you purchased the product or visit the official IMEX website for customer support contact information.
