PawHut D51-344V01SR

PawHut Outdoor Chicken Coop Run Aviary 12 m²

Model: D51-344V01SR

INTRODUCTION

Thank you for choosing the PawHut Outdoor Chicken Coop Run Aviary. This manual provides essential information for the safe and efficient assembly, operation, and maintenance of your new enclosure. Please read these instructions carefully before beginning assembly and retain them for future reference.

SETUP AND ASSEMBLY

Careful assembly is crucial for the stability and safety of the enclosure. Ensure all components are present before starting.

Components Included:

- Galvanized Steel Frame Tubes
- Wire Mesh
- PE Tarp (Roof Cover)
- Doors and Locking Mechanism
- Ground Fixing Feet
- Assembly Manual

Assembly Guidelines:

1. **Preparation:** Clear a level area of approximately 4 meters by 3 meters for assembly. Ensure you have adequate

space to work around the structure.

2. **Teamwork:** Assembly is recommended for two people and typically takes 1-2 hours.
3. **Frame Construction:** Connect the galvanized steel tubes according to the diagrams provided in the separate assembly manual. Ensure all connections are secure. The robust zinc-coated steel tubes form the primary structure.
4. **Mesh Installation:** Attach the wire mesh to the frame. Ensure the mesh is taut and securely fastened using the provided clips or ties. The mesh gap size is 42 mm.
5. **Roof Cover:** Install the PE tarp roof cover. This double-layer fabric is water-resistant and anti-UV, providing protection from the elements. Secure it using the spring button clips.
6. **Door Installation:** Mount the door(s) and ensure the locking mechanism functions correctly. The walk-in design features a door height of 166 cm for easy access.
7. **Ground Anchoring:** Utilize the ground fixing feet and appropriate ground stakes (not always included, check packaging) to secure the enclosure firmly to the ground, preventing movement due to wind or animal activity.

CONSTRUCTION SOLIDE

Crée un paradis privé spacieux pour eux

OPERATING INSTRUCTIONS

This enclosure is designed to provide a secure and spacious outdoor area for various small animals.

- **Animal Suitability:** The 12 m² ground surface is ideal for housing 10-12 chickens, ducks, geese, rabbits, or similar small animals.
- **Access:** The walk-in design allows for easy entry for feeding, cleaning, and animal care. Always ensure the door is securely latched after entering or exiting.
- **Security:** The integrated locking mechanism on the door helps prevent animals from escaping and deters potential predators. Regularly check the lock for proper function.
- **Versatility:** The enclosure can be used independently or integrated with existing wooden cages or coops to expand your animals' living space.

MULTIFONCTION

Utilisable avec des cages en bois

MAINTENANCE

Regular maintenance ensures the longevity and safety of your PawHut enclosure.

- **Cleaning:** Periodically clean the wire mesh and frame with mild soap and water. Rinse thoroughly and allow to air dry.
- **Tarp Care:** The PE tarp is water-resistant and UV-resistant. Clean it as needed with a damp cloth. Inspect it regularly for tears or damage, especially after severe weather.
- **Structural Integrity:** Regularly check all frame connections, bolts, and ground anchors to ensure they remain tight and secure. Tighten any loose components.
- **Mesh Inspection:** Inspect the wire mesh for any signs of damage, rust, or weak points that could compromise animal containment or safety. Repair or replace damaged sections promptly.
- **Door and Lock:** Ensure the door opens and closes smoothly and that the locking mechanism engages properly. Lubricate hinges if necessary.

DOUBLE COUCHE

TROUBLESHOOTING

This section addresses common issues you might encounter.

- **Instability:** If the enclosure feels unstable, re-check all frame connections and ensure ground anchors are properly installed and secured. Verify the ground surface is level.
- **Mesh Sagging:** If the wire mesh sags, ensure it is properly stretched and secured at all attachment points. Add additional ties or clips if necessary.
- **Water Accumulation on Roof:** Ensure the tarp is taut and properly angled to allow water runoff. Clear any debris that might be collecting on the roof.
- **Door Not Closing/Latching:** Check for obstructions around the door frame or hinges. Ensure the frame is square and the latch mechanism is aligned correctly.

SPECIFICATIONS

Brand	PawHut
-------	--------

Model Number	D51-344V01SR
Product Dimensions (L x W x H)	400 x 300 x 195 cm (12 m ² area)
Weight	19.5 kg
Material	Galvanized Steel, PE (Polyethylene)
Color	Silver
Mesh Gap Size	42 mm
Specific Uses	Outdoor
Special Feature	Robust, Water-resistant, UV-resistant
Recommended Breed Size	Medium
Country of Origin	China
