## 4. MAINTENANCE

### 4.1 Battery Replacement

When the remote control's performance degrades or it stops responding, it is likely time to replace the batteries. Follow the battery installation steps outlined in Section 2.1.

### 4.2 Cleaning

To clean the remote control, use a soft, dry cloth. For stubborn dirt, lightly dampen the cloth with water or a mild, non-abrasive cleaner. Avoid using harsh chemicals or abrasive materials, as these can damage the remote's surface or internal components.

### 4.3 Storage

If the remote control will not be used for an extended period, remove the batteries to prevent leakage, which can cause damage. Store the remote in a cool, dry place away from direct sunlight and extreme temperatures.

## 5. TROUBLESHOOTING

- **Remote not responding:**
  - Ensure batteries are correctly installed with the correct polarity.
  - Replace old batteries with new AAA batteries.
  - Check for any obstructions between the remote control and the TV's infrared sensor.
  - Ensure you are within the effective range of the TV's sensor.
- **Specific buttons not working:**
  - Clean the remote control, especially around the non-functional buttons, to remove any dirt or debris that might be interfering with button presses.
  - If only certain buttons are affected, and battery replacement does not resolve the issue, the remote may require replacement.
- **Remote works intermittently:**
  - This often indicates low battery power. Replace the batteries.
  - Ensure a clear line of sight to the TV.
