Assembly Steps:

1. **Unpack and Organize:** Carefully unpack all components and hardware. Lay them out on a clean, soft surface to

prevent scratches. Group similar parts together. Refer to the parts list (not provided in this manual, but typically included with the product) to identify each piece.

2. **Assemble the Bed Frame:** Begin by connecting the main bed frame components. Follow the numerical sequence in the provided assembly diagram. Ensure all bolts are finger-tightened initially.
3. **Install Guardrails:** Attach the guardrails to the upper bunk frame. Confirm they are securely fastened to prevent falls.
4. **Construct the Ladder:** Assemble the ladder rungs and side rails. Attach the completed ladder to the bed frame.
5. **Assemble the Desk Unit:** Build the desk frame and install the three drawers. Ensure drawer slides operate smoothly. The desk unit is designed to be freestanding and can be positioned as desired under the loft bed.
6. **Assemble the Wardrobe:** Construct the wardrobe frame and install the two doors. Ensure the doors open and close properly. The wardrobe includes an internal pole for hanging clothes.
