### 3. SETUP

Follow these steps to set up your owltron Home Security Camera:

1. **Unpack the Camera:** Carefully remove all components from the packaging. Verify that all accessories are present.
2. **Power On:** Connect the power adapter to the camera's power port and plug it into a standard electrical outlet. The camera will power on and initiate its startup sequence.
3. **Download the App:** Search for the "owltron" app (or specified app in product documentation) on your smartphone's app store (iOS or Android) and install it.
4. **Create an Account:** Open the app and follow the on-screen instructions to create a new user account or log in if you already have one.
5. **Add Device:** In the app, select "Add Device" or the '+' icon. Choose your camera model from the list.
6. **Connect to Wi-Fi:** Follow the app's instructions to connect the camera to your 2.4GHz Wi-Fi network. This typically involves scanning a QR code generated by the app with the camera's lens or entering Wi-Fi

credentials.

7. **Mount the Camera:** Once connected, decide on the optimal mounting location. Use the provided mounting hardware to secure the camera to a wall or ceiling. Ensure the camera has a clear view of the area you wish to monitor.
8. **Final Adjustments:** Adjust the camera's angle and pan/tilt (if applicable) through the app to achieve the desired viewing coverage.

*For detailed visual guides, refer to the in-app tutorials or the manufacturer's official support website.*

## 4. OPERATING INSTRUCTIONS

---

Once your owltron Home Security Camera is set up, you can begin monitoring and utilizing its features through the mobile application.

### 4.1 Live View and Recording

- **Access Live Feed:** Open the owltron app and select your camera from the device list to view the live video feed.
- **Manual Recording:** Tap the record button in the live view interface to manually start or stop video recording. Recordings are saved to your phone or the camera's storage (if a microSD card is installed).
- **Screenshot:** Use the screenshot button to capture still images from the live feed.

### 4.2 Two-Way Audio

- **Speak:** In the live view, press and hold the microphone icon to speak through the camera's speaker. Release to stop speaking.
- **Listen:** The camera's microphone is active by default, allowing you to hear audio from the camera's environment.

### 4.3 Motion Detection and Alerts

- **Enable/Disable:** Navigate to the camera settings in the app to enable or disable motion detection.
- **Sensitivity:** Adjust the motion detection sensitivity to minimize false alarms.
- **Alerts:** Configure push notifications to receive alerts on your smartphone when motion is detected.

### 4.4 Night Vision

The camera automatically switches to night vision mode in low-light conditions. Some models may offer different night vision modes (e.g., infrared, full-color night vision) which can be configured in the app settings.

## 5. MAINTENANCE

Regular maintenance ensures the longevity and optimal performance of your owltron Home Security Camera.

- **Clean the Lens:** Gently wipe the camera lens with a soft, dry, lint-free cloth to remove dust or smudges. Do not use harsh chemicals or abrasive materials.
- **Check Connections:** Periodically inspect all cable connections (power, network) to ensure they are secure.
- **Software Updates:** Keep the camera's firmware and the mobile app updated to the latest versions. Updates often include performance improvements and security enhancements. Check for updates within the app settings.
- **Environmental Conditions:** Ensure the camera is operating within its specified temperature and humidity ranges. While rated IP65, avoid direct exposure to heavy rain or prolonged submersion.

## 6. TROUBLESHOOTING

If you encounter issues with your owltron Home Security Camera, refer to the following common problems and solutions:

Problem	Possible Cause	Solution
Camera offline/Cannot connect to Wi-Fi	Weak Wi-Fi signal, incorrect Wi-Fi password, camera too far from router, router issues.	Ensure camera is within Wi-Fi range. Verify Wi-Fi password. Restart the camera and router. Ensure your Wi-Fi is 2.4GHz.
Poor video quality	Dirty lens, insufficient lighting, weak network connection.	Clean the camera lens. Ensure adequate lighting or check night vision settings. Improve Wi-Fi signal strength.
Motion detection not working or too many false alarms	Motion detection disabled, sensitivity too low/high, environmental factors (e.g., shadows, moving branches).	Enable motion detection in app settings. Adjust sensitivity levels. Define motion detection zones to exclude irrelevant areas.
Two-way audio issues	Microphone/speaker muted, app permissions, network latency.	Check audio settings in the app. Ensure app has microphone permissions on your phone. Verify stable network connection.

*If the problem persists, please contact customer support.*
