4. MAINTENANCE

4.1. Cleaning the Phone Case

To clean your TPU phone case, gently wipe it with a soft, damp cloth. For stubborn stains, a mild soap solution can be used. Ensure the case is completely dry before reattaching it to your phone.

4.2. Cleaning the Screen Protector

The oleophobic coating on the screen protector helps resist fingerprints. For cleaning, use a microfiber cloth to gently wipe the screen. Avoid harsh chemicals or abrasive materials that could damage the coating.

5. TROUBLESHOOTING

- **Wireless Charging:** Due to the integrated ring holder stand, direct wireless charging may not be supported. You may need to remove the case for wireless charging or use a wired charger.
- **Screen Protector Bubbles:** If bubbles appear after installation, gently lift the nearest edge of the protector and reapply, pushing the bubble out with a soft cloth. Small bubbles often disappear within

24-48 hours.

- **Ring Holder Stiffness:** The ring holder is designed to be adjustable. If it feels too stiff or loose, gentle manipulation within its rotational limits should allow for proper positioning.
- **Case Fit:** Ensure the case is correctly aligned and snapped onto all edges of the phone. If the fit seems loose, remove and re-install, ensuring proper alignment.
