To achieve optimal cleaning results with your INVICTUS X8 360° Electric Brush, follow these guidelines:

1. **Power On:** Turn on your INVICTUS X8 or X8 Pro vacuum cleaner. The electric brush rollers will begin to rotate.
2. **Cleaning Hard Floors:** Guide the electric brush across your hard floor surfaces. The motorized rollers are designed to effectively pick up dirt and debris from tiles, laminate, linoleum, and parquet.
3. **Maneuverability:** Utilize the 360° swivel joint to easily navigate around furniture legs, into corners, and under low-lying objects. The brush head allows for smooth movement in any direction.

5. **Storage:** After use, turn off the vacuum cleaner and store it in a dry place.

## MAINTENANCE

---

Regular maintenance ensures the longevity and performance of your electric brush:

- **Cleaning Brush Rollers:** Periodically check the brush rollers for tangled hair, threads, or large debris. Turn off the vacuum and detach the brush head. Carefully remove any obstructions from the rollers. Some brush heads allow for easy removal of rollers for thorough cleaning.
- **Wipe Down:** Use a dry or slightly damp cloth to wipe the exterior of the brush head. Do not use harsh chemicals or abrasive cleaners.
- **Check Connections:** Ensure the electrical contacts between the brush head and the vacuum cleaner are clean and free of dust.
