6. SAFETY INFORMATION

Your safety is paramount. Please adhere to the following guidelines:

- This electric blanket is intended for use with a standard 120V AC wall outlet and 60Hz, 100W watts.
- Do not use the blanket if it is wet.
- Avoid folding or bunching the blanket tightly while in use, as this may cause localized overheating.
- The blanket features overheat protection, which automatically shuts off the unit if it detects an unsafe temperature.
- Keep pets away from the blanket to prevent damage to the heating elements.
- Do not insert pins or other sharp objects into the blanket.
- Always disconnect the power when not in use or before cleaning.

7. TROUBLESHOOTING

If you experience any issues with your Sealy Electric Blanket, please refer to the following common solutions:

- **Blanket not heating:**

- Ensure the power cord is securely plugged into a working wall outlet.
- Verify that the controller is firmly connected to the blanket.
- Check if the power button on the controller has been pressed to turn the unit on.
- If the blanket has been on for an extended period, the auto shut-off timer may have activated. Reset the timer or power cycle the unit.

- **Uneven heating:**

- Ensure the blanket is not folded, bunched, or tucked in tightly, which can restrict heat distribution. Spread it out evenly.
- The continuous sensing technology should prevent uneven heating; if the issue persists, contact customer support.

- **Controller display not working:**

- Unplug the blanket from the wall outlet for 5 minutes, then plug it back in. This may reset the controller.

For issues not covered here, or if troubleshooting steps do not resolve the problem, please contact Sealy Customer Support.
