

## UGREEN 15598

# UGREEN Revodok 6-in-1 USB C Hub Gigabit Ethernet Adapter Instruction Manual

Model: 15598 | Brand: UGREEN

## PRODUCT OVERVIEW

---

The UGREEN Revodok 6-in-1 USB C Hub is a versatile multiport adapter designed to expand the connectivity of your USB-C enabled devices. It transforms a single USB-C port into multiple essential ports, enhancing productivity and convenience for laptops, tablets, and smartphones.

### Key Features:

- **6-in-1 Connectivity:** Integrates 4K@30Hz HDMI, Gigabit Ethernet, 100W Power Delivery (PD) charging, and three USB-A 3.0 data ports.
- **4K HD Visuals:** Supports video output up to 4K at 30Hz via the HDMI port for clear display mirroring or extension. (Note: Does not support HDR/3D).
- **Stable Gigabit Ethernet:** Provides a reliable 1000Mbps wired network connection for faster and more stable internet access compared to Wi-Fi.
- **100W Power Delivery:** Offers up to 85W pass-through charging for your laptop via the Type-C port, with 15W reserved for hub operations. (Note: USB-C port supports charging only, no data or video).
- **Fast Data Transfer:** Three USB-A 3.0 ports allow data transfer speeds up to 5Gbps, ideal for connecting peripherals like external hard drives, USB flash drives, mice, and keyboards.
- **Universal Compatibility:** Compatible with a wide range of devices including MacBook Neo/Pro/Air M1, M2, M3, M4, M5, iPad, iPhone 16 Pro/Pro Max, Steam Deck, and various laptops, smartphones, and tablets running macOS, Windows, Chrome OS, and iPadOS.
- **Durable Design:** Features a metallic finish and aluminum alloy construction for efficient heat dissipation and enhanced durability.

## PACKAGE CONTENTS

- UGREEN Revodok 6-in-1 USB C Hub (Model: 15598)

## SETUP INSTRUCTIONS

---

### 1. Connect the Hub to Your Device:

Plug the integrated USB-C cable of the UGREEN Revodok hub into an available USB-C port on your laptop, tablet, or smartphone. Ensure the connection is secure.

Image: The UGREEN Revodok 6-in-1 USB C Hub connected to a laptop, showcasing its compact design and multiple ports.

### 2. Power Delivery (Optional):

If your device requires charging or if you are connecting power-intensive peripherals, connect your original USB-C power adapter to the PD 100W USB-C port on the hub. This will provide pass-through charging to your host device.

# Powerful 100W PD Charging

Image: A laptop connected to the UGREEN Revodok hub, which is then connected to a 100W power adapter for fast charging.

### 3. Connect External Display (Optional):

For video output, connect an HDMI cable from your monitor or TV to the 4K@30Hz HDMI port on the hub. Your device should automatically detect the external display. Adjust display settings (mirror or extend) as needed in your operating system settings.

#### 4. **Connect Ethernet Cable (Optional):**

For a wired network connection, plug an Ethernet cable into the Gigabit Ethernet (RJ45) port on the hub. Connect the other end of the Ethernet cable to your router or modem. The connection should be established automatically.

# Enjoy 4K Crisp and Sharp Image

## 5. Connect USB Peripherals (Optional):

Plug your USB-A devices (e.g., mouse, keyboard, USB flash drive, external hard drive) into the three USB-A 3.0 ports on the hub.

# Transfer Files in Seconds

## OPERATING INSTRUCTIONS

---

The UGREEN Revodok 6-in-1 USB C Hub is designed for plug-and-play functionality, requiring no additional drivers for most operating systems.

### 1. Automatic Detection:

Once connected, your operating system (macOS, Windows, Chrome OS, iPadOS) should automatically detect the hub and its connected peripherals. You can verify this in your device's system settings or device manager.

### 2. Using HDMI Output:

After connecting an HDMI display, navigate to your device's display settings to configure the external monitor. Options typically include "Mirror Displays" (duplicate your primary screen) or "Extend Displays" (use the external monitor as an additional workspace).

### 3. Utilizing Ethernet:

When the Ethernet cable is connected, your device should prioritize the wired connection over Wi-Fi for internet

access. Check your network settings to confirm the Gigabit Ethernet connection is active.

#### 4. USB Data Transfer:

Files can be transferred to and from connected USB-A devices at speeds up to 5Gbps. Ensure your connected devices and cables support USB 3.0 for optimal performance.

#### 5. Powering Your Device:

The 100W PD port allows you to charge your host device while using the hub. Connect your original power adapter to the hub's PD port. The hub will draw power for its own operation and pass the remaining power to your device.

## MAINTENANCE

---

- **Cleaning:** Use a soft, dry cloth to clean the hub. Avoid liquid cleaners or aerosols.
- **Storage:** Store the hub in a cool, dry place away from direct sunlight and extreme temperatures.
- **Handling:** Avoid dropping the device or subjecting it to strong impacts. Do not attempt to disassemble the hub.
- **Cable Care:** Do not bend or twist the integrated USB-C cable excessively to prevent damage.

## TROUBLESHOOTING

---

Problem	Solution
No display on external monitor.	Ensure the HDMI cable is securely connected to both the hub and the monitor. Verify the monitor input source is set correctly to HDMI. Check your device's display settings to ensure the external display is detected and configured (mirror/extend). Try a different HDMI cable or monitor if possible.
Ethernet connection is unstable or not working.	Ensure the Ethernet cable is securely connected to both the hub and your router/modem. Check your device's network settings to confirm the wired connection is active. Try a different Ethernet cable. Restart your router/modem and your host device.
USB devices are not recognized.	Ensure the USB device is properly inserted into the hub's USB-A port. Try connecting the USB device to a different port on the hub or directly to your host device to rule out device issues. Restart your host device.
Device is not charging via PD port.	Ensure your power adapter is connected to the hub's PD USB-C port and is functioning correctly. Verify your power adapter provides sufficient wattage (e.g., 100W) for your device and the hub. Confirm your host device supports USB-C Power Delivery.
Hub feels warm during use.	It is normal for the hub to generate some heat during operation, especially when multiple ports are in use or when charging. The aluminum casing helps dissipate heat. Ensure adequate ventilation around the hub.

## SPECIFICATIONS

---

Feature	Detail
Brand	UGREEN
Model Number	15598
Color	Grey
Hardware Interface	Ethernet, HDMI, USB, USB Type C
Special Features	Fast Data Transfer, Heat Resistant, Lightweight, Plug and Play, Portable
Compatible Devices	Laptops, MacBook Neo, Macbook M5/M4/M3/M2/M1, Smartphones, Tablets
Total USB Ports	3 (USB-A 3.0)
Data Transfer Rate	5 Gigabits Per Second
Number of Ports	6
HDMI Output	4K@30Hz
Ethernet Port	Gigabit (1000Mbps) RJ45
Power Delivery (PD)	100W (85W to host, 15W for hub)
Minimum Required Operating System	Windows 7
Operating System Compatibility	Mac OS 9, Windows 10, Windows 7, Chrome OS, iPadOS
Enclosure Material	Plastic (with Aluminum Alloy for heat dissipation)
Item Weight	140 Grams

## WARRANTY & SUPPORT

---

**Warranty:** This product comes with a 24-month warranty from the date of purchase.

**Customer Support:** For technical assistance, troubleshooting, or warranty claims, please contact UGREEN customer support through their official website or the retailer where the product was purchased. Please have your model number (15598) and proof of purchase ready.
