UGREEN CM653

UGREEN CM653 USB 3.0 Hub User Manual

Model: CM653 / 15548

1. Product Overview

The UGREEN CM653 USB 3.0 Hub expands a single USB port into four USB 3.0 ports, allowing you to connect multiple USB devices simultaneously. It is designed for efficient data transfer and broad compatibility with various operating systems and devices.

2. Features

- **Four USB 3.0 Ports:** Provides four additional USB 3.0 ports for connecting peripherals such as external hard drives, USB flash drives, keyboards, mice, and printers.
- **High-Speed Data Transfer:** Supports data transfer speeds up to 5Gbps, enabling quick synchronization of files and efficient workflow. This is significantly faster than USB 2.0.

Image 2: Visual representation of the 5Gbps data transfer capability, highlighting its speed compared to USB 2.0.

- **Stable Power Supply:** Features a 5V/2A power input port (power adapter sold separately) to ensure stable transmission for power-hungry devices like external hard drives. *Note: This power input is for the hub and connected devices, not for charging the host computer.*

- **Durable and Reliable Design:** Built with a durable braided cable and nickel-plated interface for enhanced longevity. Includes multiple protection mechanisms:
  - Over-current Protection
  - Over-voltage Protection
  - Short-circuit Protection
  - High-temperature Protection

- **Universal Compatibility:** Compatible with a wide range of operating systems and USB A devices.
  - **Systems:** Windows, macOS, iOS, Linux, Chrome OS
  - **USB A Devices:** Card readers, keyboards, printers, mice, HDDs, USB cameras, USB sticks, PS4/PS5/Xbox consoles, USB microphones.

3. Setup Instructions

1. **Connect to Host Device:** Plug the USB-A connector of the UGREEN CM653 hub into an available USB-A port on your computer, laptop, or other compatible host device.
2. **Connect Peripherals:** Insert your USB devices (e.g., mouse, keyboard, flash drive, external hard drive) into the four available USB 3.0 ports on the hub.
3. **Optional External Power (for power-hungry devices):** If you are connecting devices that require more power (e.g., external hard drives), connect a 5V/2A power adapter (not included) to the micro USB power input port on the hub. This ensures stable operation for all connected devices.
4. **Verify Connection:** The blue LED indicator on the hub will illuminate when it is properly connected and powered. Your operating system should automatically detect the hub and connected devices (Plug & Play).

4. Operating Instructions

- **Plug and Play:** The UGREEN CM653 hub is a plug-and-play device. No drivers are typically required for most operating systems.
- **Connecting Devices:** Simply insert your USB devices into any of the four USB 3.0 ports. The hub will automatically detect and configure the device.
- **Disconnecting Devices:** For optimal performance and to prevent data corruption, especially with storage devices, always safely eject the device from your operating system before physically unplugging it from the hub.
- **LED Indicator:** The blue LED light indicates that the hub is powered and operational.

5. Maintenance

- **Cleaning:** Use a soft, dry cloth to clean the surface of the hub. Avoid using liquid cleaners or solvents.

- **Storage:** Store the hub in a cool, dry place away from direct sunlight and extreme temperatures when not in use.
- **Cable Care:** Avoid bending or twisting the cable excessively to prevent damage to the internal wires.

6. Troubleshooting

- **Device Not Recognized:**
  - Ensure the hub is securely plugged into your host device.
  - Try connecting the device directly to your host device's USB port to confirm it works.
  - If using power-hungry devices, ensure an external 5V/2A power adapter is connected to the hub.
  - Try a different USB port on your host device.
  - Restart your computer.
- **Slow Data Transfer Speed:**
  - Ensure both the hub and your connected device support USB 3.0 speeds. If either is USB 2.0, speeds will be limited to USB 2.0.
  - Ensure the hub is connected to a USB 3.0 port on your host device.
  - Avoid connecting too many power-hungry devices without an external power adapter.
- **Intermittent Connection:**
  - Check all cable connections for looseness.
  - Ensure the hub is not overloaded with devices requiring too much power without an external power supply.
  - Avoid placing the hub near strong electromagnetic interference sources.
