MAF MT09-JDM-12

MAF 12 Inch Queen Bed Frame Instruction Manual

Model: MT09-JDM-12
Brand: MAF

Welcome

Thank you for choosing the MAF 12 Inch Queen Bed Frame. This manual provides detailed instructions for assembly, operation, maintenance, and troubleshooting to ensure you get the most out of your new bed frame. Please read this manual thoroughly before beginning assembly and retain it for future reference.

Product Overview

The MAF 12 Inch Queen Bed Frame is designed for durability and ease of use, featuring a heavy-duty metal construction and a thoughtful design to enhance your bedroom experience.

- **Sturdy and Durable:** Constructed with robust steel slats, supporting up to 2500 lbs.
- **Anti-Slip Design:** Includes rubber plugs on feet to prevent sliding and protect floors, along with four anti-slip baffles to secure the mattress.
- **Headboard Compatible:** Reserved holes on the front legs allow for easy attachment of a headboard (not included).
- **No Box Spring Needed:** Designed to support your mattress directly, eliminating the need for a box spring.
- **Easy Assembly:** All necessary parts, tools, and instructions are included for quick setup.

Important Safety Information

- Ensure proper assembly according to instructions.
- Do not exceed the maximum weight capacity of 2500 pounds.
- Distribute weight evenly across the frame for stability and safety.
- Keep small parts away from children during assembly.
- Periodically check all bolts and connections to ensure they remain tight.

Setup (Assembly)

The MAF bed frame is designed for quick and easy assembly, typically taking around 30 minutes. All necessary tools and parts are included and clearly marked.

Assembly Steps:

1. Unpack all components and verify against the parts list provided in the packaging.
2. Lay out the main frame sections on a clean, flat surface.
3. Connect the side rails and center support beams using the provided bolts and wrench. Ensure all connections are

secure but do not fully tighten until all parts are aligned.

4. Attach the support legs to the frame.
5. Insert the steel slats into their designated slots across the frame.
6. Once all components are in place, fully tighten all bolts to ensure maximum stability.
7. Install the anti-slip baffles at the head and foot of the frame to prevent mattress movement.

Figure 3: Detail of the integrated structure design, which simplifies the assembly process and enhances stability.

Operating (Usage)

The MAF bed frame is designed for straightforward use with various mattress types.

Mattress Placement:

Place your queen-size mattress directly onto the steel slats. A box spring is not required for this platform bed frame, saving space and cost.

Figure 4: The bed frame supporting a mattress directly, highlighting the 10.4-inch under-bed clearance for convenient storage without a box spring.

Mattress Slide Stopper:

The integrated anti-slip baffles at the head and foot of the frame are designed to prevent your mattress from shifting or sliding, ensuring a stable sleeping surface.

Figure 5: Visual comparison demonstrating the effectiveness of the mattress slide stopper in preventing mattress movement.

Headboard Compatibility:

The front legs of the bed frame feature pre-drilled holes, allowing you to easily attach most standard headboards (headboard not included).

Figure 6: Detailed view of the bed frame's features, including the reserved holes for headboard attachment, anti-slip baffles, and rubber foot plugs for floor protection.

Figure 7: Close-up of the triangular structure at the frame's corners, designed to enhance overall strength and stability.

Figure 8: Detail of the rubber foot mat, which provides noise-free operation and protects your flooring from scratches.

Maintenance

To ensure the longevity and continued performance of your MAF bed frame, follow these simple maintenance guidelines:

- **Cleaning:** Wipe down the metal frame with a soft, damp cloth. Avoid using harsh chemicals or abrasive cleaners, as these can damage the finish.
- **Inspection:** Periodically (e.g., every 6 months) check all bolts and connections to ensure they are tight. Re-tighten if

necessary to maintain stability and prevent squeaking.

- **Weight Distribution:** Always distribute weight evenly across the bed frame to prevent undue stress on any single point.

Troubleshooting

If you encounter any issues with your MAF bed frame, refer to the following common problems and solutions:

Problem	Possible Cause	Solution
Squeaking or Noise	Loose bolts or connections.	Check and tighten all bolts and connections on the frame. Ensure the mattress is properly seated.
Mattress Sliding	Anti-slip baffles not installed or dislodged.	Ensure the four anti-slip baffles are correctly installed at the head and foot of the frame.
Mattress Sagging/Bulging Through Slats	Mattress type incompatible with slat spacing or older mattress.	The distance between slats is 5.6 inches. If your mattress requires closer support (e.g., some memory foam or older mattresses), consider adding a thin plywood sheet or bunkie board on top of the slats for additional support.
Frame Instability	Uneven floor or improper assembly.	Ensure the frame is on a level surface. Re-check all assembly steps and tighten all bolts securely. Verify rubber plugs are on all feet.

Specifications

Detailed specifications for the MAF 12 Inch Queen Bed Frame:

Feature	Detail
Size	Queen
Product Dimensions (L x W x H)	79.5" x 59.5" x 12"
Compatible Mattress Size	80" x 60"
Maximum Weight Capacity	2500 lbs
Color	Black
Finish Type	Matte
Included Components	Bed Frame with Mattress Slide Stopper
Assembly Required	Yes
Item Weight	34.3 pounds

Feature	Detail
Model Number	MT09-JDM-12
