The control panel allows you to select operating modes, adjust temperature, set fan speed, and activate special functions. The remote control provides full functionality from a distance.

3. SETUP AND INSTALLATION

Proper installation is crucial for the efficient operation of your portable air conditioner. The unit comes with a flexible hose, a window adapter, and a fixed glass installation kit.

Placement

- Place the unit on a flat, stable surface.
- Ensure there is at least 20 cm (8 inches) of space around the unit for proper airflow.
- Position the unit near a window or opening for exhaust hose installation.

Exhaust Hose Installation

1. Attach one end of the flexible exhaust hose to the air outlet on the back of the unit.
2. Connect the window adapter to the other end of the exhaust hose.
3. Open the window and place the window adapter securely in the window opening. Ensure the window is closed as much as possible around the adapter to prevent air leakage.
4. For fixed glass installation, follow the specific instructions provided with the kit to create a permanent opening for the exhaust hose.

Ensure the exhaust hose is as short and straight as possible to maximize efficiency. Avoid kinks or sharp bends in the hose.

4. OPERATING THE UNIT

The Argo Milo Plus New offers four main operating modes: Cooling, Heating, Dehumidification, and Fan.

Power On/Off

Press the **On/Off** button on the control panel or remote control to turn the unit on or off.

Mode Selection

Press the **Mode** button to cycle through the available operating modes:

- **Cooling Mode:** For cooling the room. Adjust the desired temperature using the **+** and **-** buttons.
- **Heating Mode:** For heating the room (heat pump function). Adjust the desired temperature.
- **Dehumidification Mode:** Removes excess moisture from the air. The fan speed is typically fixed in this mode.
- **Fan Mode:** Circulates air without cooling or heating. Select fan speed (Low, Medium, High, Auto).

Fan Speed Adjustment

In Cooling, Heating, and Fan modes, press the **Fan** button to select fan speed: Low, Medium, High, or Auto.

Special Functions

- **Swing Function:** Activates the motorized flap for automatic oscillation of airflow. Press the **Swing** button to toggle between fixed position and automatic oscillation.
- **Timer Function:** Set a programmable 24-hour on/off timer. Refer to the detailed instructions in the full manual for setting the timer.
- **Sleep Mode:** Optimizes operation for comfortable sleep by gradually adjusting temperature and fan speed.
- **Wi-Fi Function:** Connect the unit to your home Wi-Fi network for remote control via a smartphone application. Follow the instructions provided in the app for pairing.
- **Memory Function:** The unit retains your last settings after power off.
- **X-Fan Function:** Helps dry the evaporator to prevent mold and odors after cooling operation.
- **Self-Diagnosis:** The unit can detect and display certain operational errors. Refer to the troubleshooting section for error codes.

5. MAINTENANCE

Regular maintenance ensures optimal performance and extends the lifespan of your Argo Milo Plus New.

Cleaning the Air Filter

The unit is equipped with a washable, easily removable air filter. Clean the filter regularly, especially if the unit is used frequently.

1. Turn off the unit and unplug it from the power outlet.
2. Locate the air filter access panel on the back of the unit.
3. Carefully remove the filter.
4. Wash the filter with lukewarm water and a mild detergent. Rinse thoroughly.
5. Allow the filter to air dry completely before reinserting it into the unit. Do not expose to direct sunlight.

Water Drainage

During dehumidification or cooling operation, water condensation will accumulate inside the unit. The unit may have a continuous drainage option or require manual emptying of a water tank (if applicable). Refer to the full manual for specific drainage instructions for your model.

Note: Some portable air conditioners require continuous drainage via a hose, especially in high humidity environments. Ensure the drainage hose is properly connected and directed to a suitable drain if using this option.

6. TROUBLESHOOTING

Before contacting customer support, please refer to the following common issues and their solutions.

Problem	Possible Cause	Solution
Unit does not turn on.	No power, power cord unplugged, circuit breaker tripped.	Check power connection, wall outlet, and circuit breaker.
Unit not cooling/heating effectively.	Air filter dirty, exhaust hose blocked/kinked, windows/doors open, room too large.	Clean air filter, check exhaust hose, close windows/doors, ensure unit is suitable for room size.
Loud noise during operation.	Unit not on a level surface, fan obstruction.	Place unit on a flat surface, check for obstructions in fan area.
Water leakage.	Drainage hose not connected properly, water tank full (if applicable).	Ensure drainage hose is secure and directed to a drain, empty water tank.
Wi-Fi connection issues.	Incorrect Wi-Fi password, unit too far from router, router issues.	Verify password, move unit closer to router, restart router, consult app instructions.

For error codes displayed on the LED screen, refer to the comprehensive troubleshooting guide in the full product manual or contact customer support.
