Installation Steps

1. **Power Off:** Before beginning installation, ensure that the power to the HVAC system is completely turned off at the circuit breaker.
2. **Remove Old Thermostat:** Carefully remove the existing thermostat from the wall. Note the wiring connections.
3. **Mounting:** Use the provided mounting hardware to secure the new Trane thermostat base plate to the wall. Ensure it is level.
4. **Wiring:** Connect the HVAC system wires to the corresponding terminals on the Trane thermostat. Refer to the wiring diagram provided with your specific HVAC unit for accurate connections. This thermostat supports 4 Heat/2 Cool systems.
5. **Attach Thermostat:** Secure the thermostat unit onto the mounted base plate.
6. **Power On:** Restore power to the HVAC system at the circuit breaker.
7. **Initial Setup:** Follow the on-screen prompts for initial setup, including date, time, and system type configuration.

Note: Professional installation is recommended for complex HVAC systems or if you are unsure about wiring procedures.

OPERATING INSTRUCTIONS

Basic Operation

The Trane thermostat features a touch screen interface for easy navigation and control.

- **Mode Selection:** Tap the "Mode" button to cycle through available modes: Heat, Cool, Auto, Off.
- **Fan Control:** Tap the "Fan" button to select fan operation: Auto (fan runs only when heating/cooling) or On (fan runs continuously).
- **Temperature Adjustment:** Use the Up/Down arrows on the screen to adjust the desired temperature setpoint.

7-Day Programmable Schedule

The 7-day programming feature allows you to customize temperature settings for different times of the day and days of the week, optimizing comfort and energy savings.

1. **Access Program Menu:** Navigate to the "Program" or "Schedule" menu option on the touch screen.
2. **Select Day:** Choose the day or group of days (e.g., Mon-Fri, Sat-Sun) you wish to program.
3. **Set Time Periods:** For each day, define up to four time periods (e.g., Wake, Leave, Return, Sleep)

and their corresponding desired temperatures for both heating and cooling.

4. **Save Settings:** Confirm and save your programmed schedule.

Consult the on-screen prompts and detailed menu options for specific programming steps.

MAINTENANCE

Cleaning the Thermostat

To maintain optimal performance and appearance, clean the thermostat periodically.

- Use a soft, damp cloth to wipe the exterior of the thermostat.
- Do not use abrasive cleaners, solvents, or chemical sprays, as these can damage the plastic or electronic components.
- Avoid spraying liquids directly onto the thermostat.

Battery Replacement

This thermostat is typically powered by the HVAC system's 24V AC power. If your model includes a battery compartment for backup power or specific functions, replace batteries (usually AA or AAA) when a low battery indicator appears on the display. Ensure power to the HVAC system is off before replacing batteries.

TROUBLESHOOTING

If you experience issues with your Trane thermostat, refer to the following common troubleshooting steps:

Problem	Possible Cause	Solution
Thermostat display is blank.	No power to the thermostat; tripped circuit breaker; loose wiring.	Check circuit breaker for HVAC system. Ensure all wiring connections are secure. Consult an HVAC technician if power is not restored.
HVAC system not responding to thermostat.	Incorrect mode selected; loose wiring; system lockout.	Verify correct mode (Heat/Cool/Auto) is selected. Check wiring connections. Power cycle the HVAC system at the breaker for 5 minutes.
Temperature reading seems inaccurate.	Thermostat location; sensor obstruction.	Ensure thermostat is not exposed to direct sunlight, drafts, or heat sources. Clean any dust or debris from the thermostat vents.

For issues not listed here or if troubleshooting steps do not resolve the problem, contact a qualified HVAC technician or Trane customer support.
