- Unpack Components:** Carefully unpack all boxes and verify that all parts and hardware listed in the assembly guide are present.
- Prepare Workspace:** Clear a spacious area for assembly, preferably near the final placement of the bed. Lay down a blanket or cardboard to protect flooring and furniture parts.

- Install Slatted Base:** Once the main frame is stable, place and secure the slatted bed base. Ensure slats are evenly spaced and properly attached for optimal mattress support.
- Assemble Drawers:** Assemble the storage drawers according to the instructions, then slide them into their designated compartments under the bed.
- Final Checks:** Before placing the mattress, ensure all screws and fasteners are tightened securely.

6. MAINTENANCE AND CARE

Proper care will extend the life and appearance of your BRIMNES bed frame.

- **Cleaning:** Wipe clean with a damp cloth and a mild cleaner. Then wipe dry with a clean cloth. Avoid using abrasive cleaners or harsh chemicals, as these can damage the finish.
- **Dusting:** Regularly dust the bed frame with a soft, dry cloth to prevent dust buildup.
- **Drawer Maintenance:** Periodically check the drawer runners for any debris or dust that might hinder smooth operation. Clean as needed.
- **Tighten Fasteners:** Over time, screws and fasteners may loosen. Periodically check and re-tighten all connections to ensure the bed frame remains stable and secure.
- **Avoid Excessive Weight:** Do not exceed the maximum weight recommendation of 200 kg for the bed frame.

7. TROUBLESHOOTING

- **Squeaking Noises:** If the bed frame squeaks, check all connections and re-tighten any loose screws. Ensure the slatted base is correctly positioned and secured. Sometimes, placing felt pads between contact points can help.
- **Drawers Sticking/Not Sliding Smoothly:**
 - Check if the drawers are overloaded. Remove some items if necessary.
 - Inspect the drawer runners for any obstructions, dust, or damage. Clean the runners and wheels.
 - Ensure the drawer assembly is correct and not warped.
- **Bed Frame Wobbles:** Verify that the bed frame is assembled on a level surface. Check all main frame connections and ensure they are fully tightened.
