OPERATING INSTRUCTIONS

Adjusting Mattress Base Height:

The Myllra crib features an adjustable mattress base with three height settings. This allows you to lower the mattress as your child grows and becomes more mobile, ensuring their safety and making it easier for you to lift them in and out.

1. **Highest Position:** Ideal for newborns and infants who are not yet able to sit up or push themselves up on their hands and knees. This position minimizes bending for parents.

2. **Middle Position:** Use this position when your child begins to sit up independently. This prevents them from climbing out of the crib.

3. **Lowest Position:** This is the safest position for active toddlers who can stand or pull themselves up. It provides maximum depth to prevent climbing out.

Refer to your assembly manual for specific instructions on how to adjust the mattress base height safely.

Converting to Toddler Bed:

When your child is old enough to climb in and out of the crib independently, typically around 18-24 months, you can convert the Myllra crib into a toddler bed by removing one side. A safety barrier is included to ensure continued safety during this transition.

- Ensure the mattress base is in the lowest position before converting.
- Carefully remove the designated side panel as per the assembly instructions.
- Install the provided safety barrier to prevent accidental falls.

Using the Storage Drawer:

The spacious drawer located at the base of the crib provides convenient storage. It operates smoothly and closes softly and silently, preventing pinched fingers and disturbing your child's sleep.

MAINTENANCE

Proper care and maintenance will extend the life of your IKEA Myllra Baby Crib.

- **Cleaning:** Wipe with a dry cloth. For stubborn marks, use a damp cloth with a mild cleaner, then wipe dry immediately. Avoid abrasive cleaners or strong chemicals.
- **Inspections:** Regularly check all screws and fittings to ensure they are tight. Retighten if necessary, but do not overtighten.
- **Damage:** If any part of the crib is broken, torn, or missing, discontinue use immediately and contact IKEA customer service for replacement parts. Do not use substitute parts.
- **Environment:** Keep the crib away from direct sunlight or heat sources to prevent warping or fading of the wood.
