MAINTENANCE AND CARE

To ensure the longevity and appearance of your BRIMNES bed frame, follow these simple care instructions:

- **Cleaning:** Wipe the bed frame surfaces with a dry cloth. Avoid using abrasive cleaners or harsh chemicals, as these can damage the finish.
- **Inspection:** Periodically check all screws and fittings to ensure they are tightened. Retighten if necessary to maintain stability.
- **Weight Limit:** Do not exceed the maximum recommended weight of 200 kilograms for the bed frame.

TROUBLESHOOTING

Should you encounter any issues with your BRIMNES bed frame, consider the following:

- **Squeaking Noises:** If the bed frame makes squeaking noises, check all connections and ensure they are securely tightened. Loose screws are a common cause.
- **Drawer Malfunction:** If a drawer does not slide smoothly, check for obstructions in the runners or ensure the drawer is correctly assembled and aligned.
- **Stability Issues:** If the bed frame feels unstable, re-verify that all assembly steps were followed correctly and all fasteners are tight.

For persistent issues not resolved by these steps, please refer to the support section.
