IKEA IK.102.485.19

IKEA Gulliver Baby Crib Instruction Manual

Model: IK.102.485.19

1. Product Overview

The IKEA Gulliver Baby Crib is designed to provide a safe and comfortable sleeping environment for your baby. This crib features an adjustable bed base, allowing you to set the mattress at two different heights to suit your child's age and development.

Key Features:

- **Adjustable Bed Base:** The bed base can be placed at two different heights to ensure safety and convenience as your child grows.
- **Durable Construction:** Made from solid wood (pine), ensuring stability and longevity.
- **Standard Size:** Designed for a mattress of 60 x 120 cm.
- **Color:** White finish to complement various nursery decors.

2. Safety Information

Your child's safety is paramount. Please read and follow all safety instructions carefully before assembly and use.

- Always ensure all assembly fittings are correctly tightened. Regularly check and re-tighten as necessary.
- Do not use the crib if any parts are broken, torn, or missing. Contact IKEA for replacement parts.

- The maximum recommended load for this crib is 20 kg (44 lbs).
- Use only a mattress that is 60 x 120 cm and has a thickness that ensures the internal height (from the surface of the mattress to the top of the crib side) is at least 50 cm (19.7 inches) when the base is in the lowest position, and at least 20 cm (7.9 inches) when the base is in the highest position.
- Do not leave anything in the crib that could provide a foothold for your child to climb out, such as large toys or pillows.
- Keep the crib away from heat sources, windows, and cords that could pose a strangulation hazard.
- When your child is able to climb out of the crib, the crib should no longer be used for that child.

3. Setup and Assembly

Assembly of the IKEA Gulliver Baby Crib is required. It is recommended that two adults assemble the crib to ensure stability and ease of construction. Please ensure you have all parts before beginning assembly.

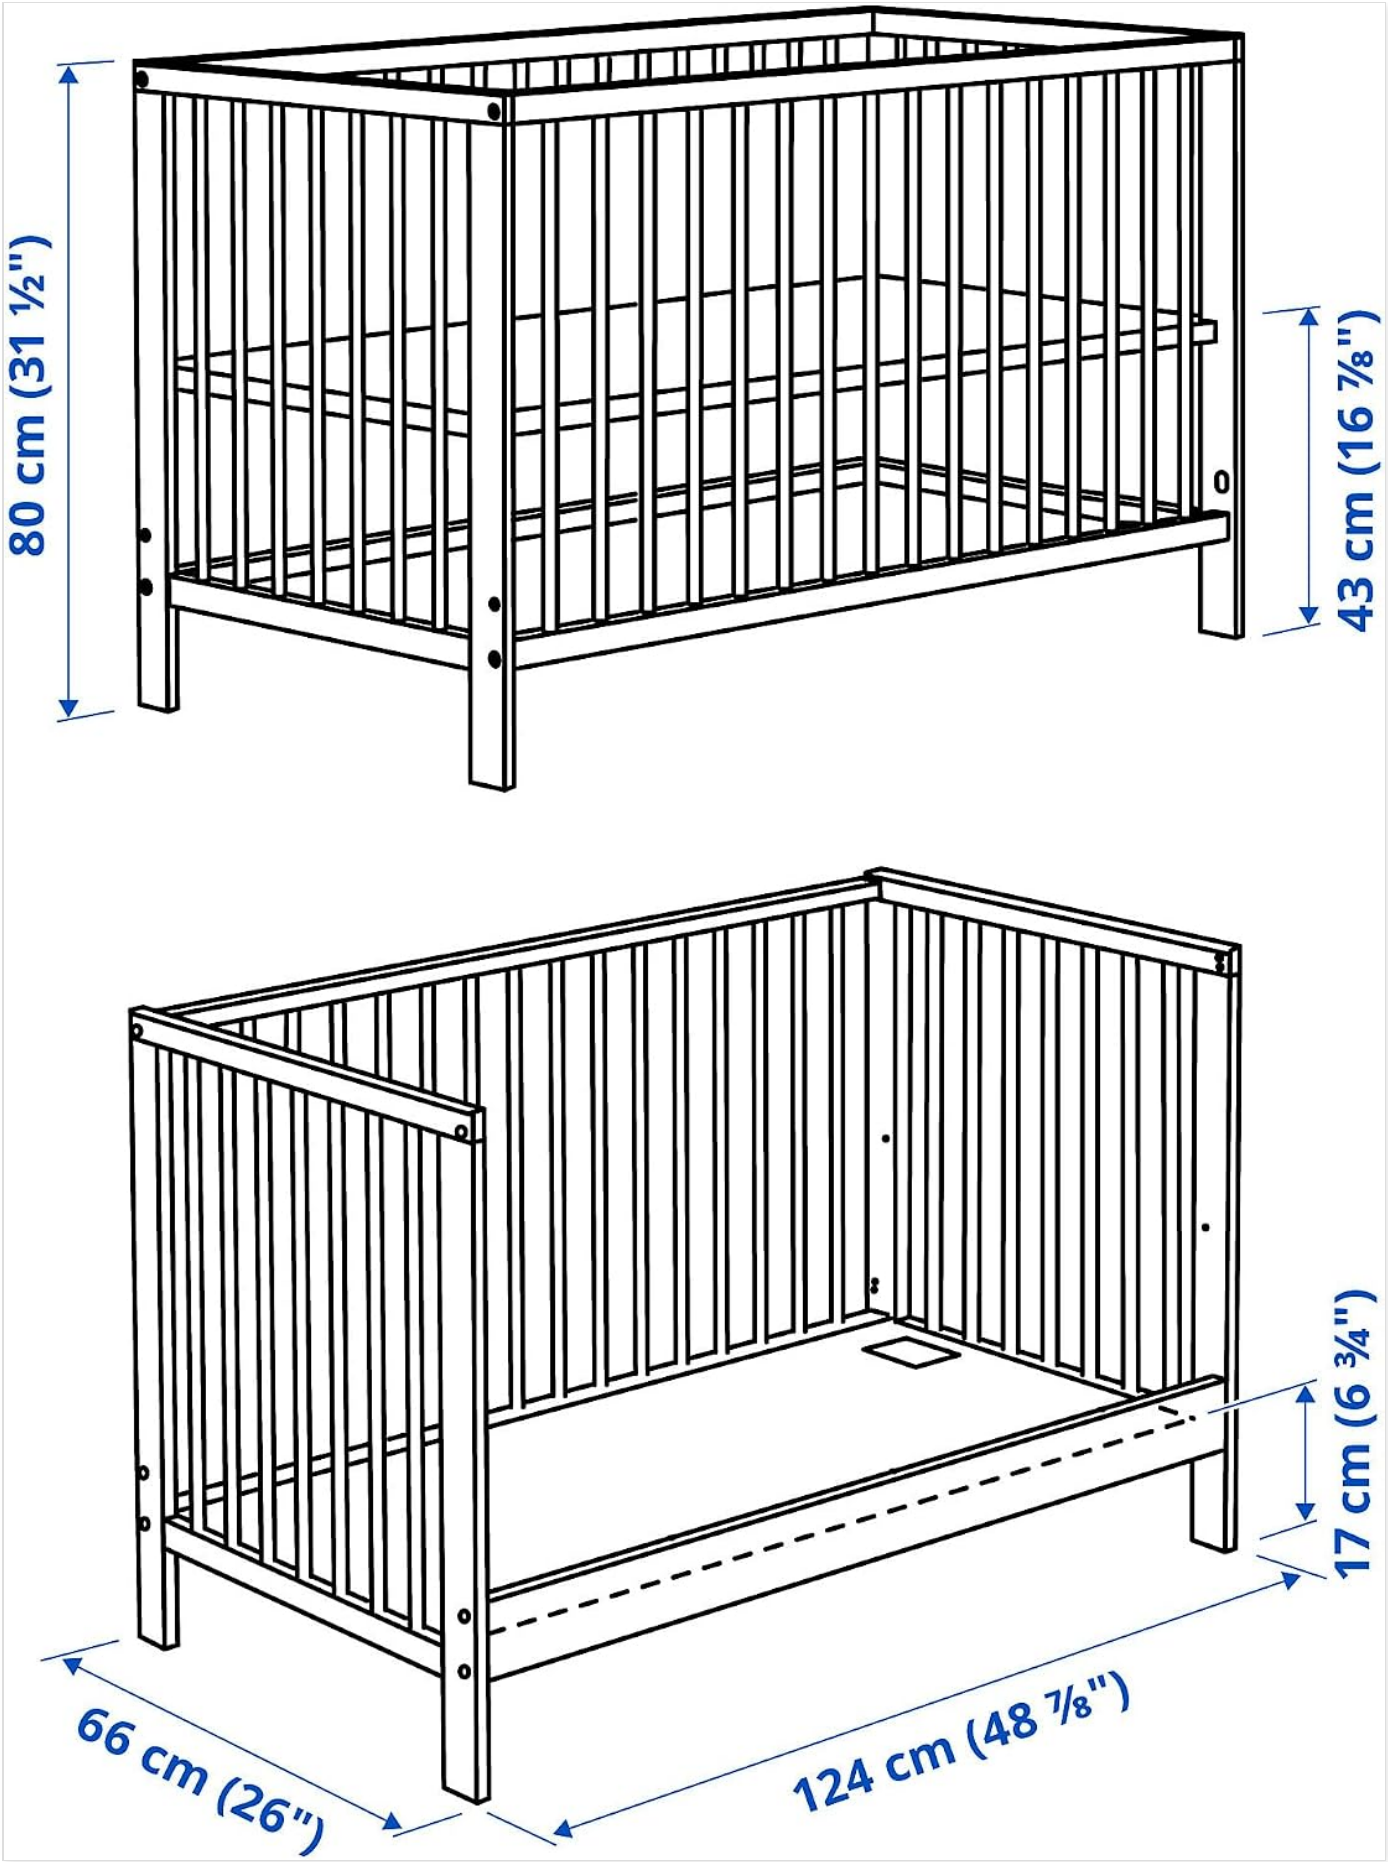

Image 3.1: Technical drawing showing the dimensions of the crib, useful for assembly and space planning.

Assembly Steps (General Guidance):

1. **Unpack and Identify Parts:** Carefully unpack all components and hardware. Refer to the included assembly

instructions (not provided in this manual) to identify each part.

2. **Assemble Side Panels:** Attach the side panels to the head and footboards using the provided screws and tools. Ensure all connections are secure but do not fully tighten yet.
3. **Install Bed Base:** Insert the bed base into the desired height position. The crib offers two height settings. For newborns, the higher position is often preferred for easier access. As your child grows and can sit up or pull themselves up, the lower position should be used to prevent climbing out.
4. **Final Tightening:** Once all components are in place, systematically tighten all screws and fasteners. Do not overtighten.
5. **Safety Check:** Before placing your child in the crib, ensure it is stable, all parts are securely fastened, and there are no sharp edges or protruding parts.

For detailed, step-by-step assembly instructions, please refer to the specific assembly guide included with your product packaging.

4. Operating and Usage

The IKEA Gulliver Baby Crib is designed for ease of use while prioritizing your child's safety.

Adjusting Bed Base Height:

The bed base can be adjusted to two different heights. This feature allows you to adapt the crib to your child's developmental stage, making it easier to lift a newborn in and out, and safer for an older, more mobile infant.

- **Higher Position:** Ideal for newborns and younger infants who cannot yet sit up or push themselves up. This position reduces strain on your back when lifting the baby.
- **Lower Position:** Essential for older infants who can sit up, crawl, or pull themselves to a standing position. This prevents the child from climbing out of the crib. Always lower the bed base before your child reaches these milestones.

To adjust the height, you will need to partially disassemble the crib to reposition the bed base supports. Refer to the assembly instructions for the exact procedure.

Image 4.1: The crib can be adapted for a toddler by removing one side, extending its usability.

The Gulliver crib can also be converted into a toddler bed by removing one of the long sides when your child is old enough to climb in and out safely. This extends the product's lifespan and utility.

5. Maintenance

Proper maintenance will help prolong the life of your IKEA Gulliver Baby Crib and ensure it remains safe for your child.

Cleaning Instructions:

- Wipe the crib clean with a dry cloth.
- For tougher stains, use a damp cloth and a mild cleaner. Wipe dry immediately.
- Avoid using abrasive cleaners or strong chemicals, as these can damage the finish.

Regular Checks:

- Periodically check all screws and fasteners to ensure they are tight. Re-tighten if necessary.
- Inspect the crib for any signs of wear, damage, or loose parts.
- Ensure there are no splinters or sharp edges that could harm your child.

6. Troubleshooting

If you encounter any issues with your IKEA Gulliver Baby Crib, refer to the following common problems and solutions:

Problem	Possible Cause	Solution
Crib feels wobbly or unstable.	Loose fasteners.	Check and tighten all screws and bolts. Ensure all parts are correctly aligned.
Difficulty adjusting bed base height.	Parts are misaligned or stuck.	Ensure the crib is empty. Carefully follow the assembly instructions for bed base adjustment. Do not force parts.
Squeaking noises.	Loose joints or friction between parts.	Tighten all fasteners. If squeaking persists, disassemble and reassemble, ensuring all connections are flush.
Missing or damaged parts.	Packaging error or transit damage.	Do not attempt to use the crib. Contact IKEA customer support immediately for replacement parts.

7. Specifications

Detailed specifications for the IKEA Gulliver Baby Crib:

Attribute	Value
Brand	IKEA
Model Number	IK.102.485.19
Color	White
Material	Wood (Pine)
Assembled Length	123 cm (48.4 inches)
