Lamshaw K21

Lamshaw TPU Screen Protector User Manual for Kuizil K21 Smartwatch

Model: K21

INTRODUCTION

This manual provides detailed instructions for the proper installation, operation, and maintenance of your Lamshaw TPU Screen Protector, designed specifically for the Kuizil K21 1.69-inch Touch Screen Smartwatch. Please read this manual thoroughly before installation to ensure optimal performance and longevity of the screen protector.

SETUP: SCREEN PROTECTOR INSTALLATION

Ensure your smartwatch model is the Kuizil K21 (1.69-inch touch screen) before proceeding. The screen protector consists of three layers. Follow these steps carefully for a bubble-free installation:

1. **Clean the Screen:** Use a wet paper wipe first, then a dry paper wipe. Finish by gently cleaning the display with the provided fiber cloth to remove any dust or smudges.
2. **Identify Layers:** The protector has three layers. The middle layer is the actual screen protector. It is sandwiched between two protective films, typically labeled "Back 1" (red) and "Front 2" (black).
3. **Peel "Back 1":** Carefully peel off the red "Back 1" layer. This exposes the adhesive side of the screen protector.
4. **Apply Protector:** Align the screen protector precisely with the smartwatch screen. Gently place it onto the screen, starting from one side and slowly laying it down.
5. **Remove Bubbles:** Use a card (e.g., credit card) to gently push out any air bubbles from the center towards the edges.

Apply steady pressure. If a large bubble persists, you may need to carefully lift a corner of the protector and reapply, pushing the bubble out.

6. **Peel "Front 2"**: Once the protector is smoothly applied and bubbles are removed, carefully peel off the black "Front 2" layer. The middle layer (the actual screen protector) should remain on the screen.
7. **Final Press**: Press the entire screen with your hand, especially around the edges, to ensure secure adhesion.

Important Note: If you accidentally peel "Front 2" first and find the side not sticky, it means you've exposed the wrong side. In this situation, gently wrinkle the red "Back 1" layer, separate it to reveal the middle layer, and then ensure the correct sticky side is exposed before applying to the screen.

Installation Instructions

1: Clean the screen: use wet paper first,
second use the dry paper,
last clean the display use the fiber cloth

2: Remove Back stick 1

3: Align the edge of the screen and
stick to one side

4: When installing,
use a card to push from one side to the other,
and tear off the sticker 1 at the same time

5: Press the entire screen with
your hand to the edge

6: Remove the stick 2. If there are bubbles,
please use your hand
to make the bubble disappear

OPERATING THE SMARTWATCH WITH PROTECTOR

The Lamshaw TPU Screen Protector is designed to integrate seamlessly with your Kuizil K21 Smartwatch, maintaining full functionality while providing protection.

- **Touch Sensitivity:** The protector ensures ultra-responsive touch sensitivity, allowing for smooth and accurate interaction with your smartwatch screen.
- **Clarity:** Enjoy 99.9% ultra-clear HD viewing, preserving the original display quality of your smartwatch.
- **Protection:** The TPU material offers anti-shatter and anti-scratch properties, safeguarding your screen from daily wear and accidental impacts.
- **Flexibility and Durability:** Made from flexible TPU, the protector can withstand bending and minor impacts, contributing to its protective qualities.

99.9% Ultra-Clear HD

MAINTENANCE

To ensure the longevity and clarity of your Lamshaw TPU Screen Protector, follow these simple maintenance guidelines:

- **Cleaning:** Use a soft, lint-free cloth (like the one provided) to gently wipe the screen protector. For stubborn smudges, slightly dampen the cloth with water or a screen cleaner specifically designed for electronics. Avoid harsh chemicals or abrasive materials.
- **Self-Healing Properties:** The TPU material features a self-healing capability for minor scratches. Small scratches may disappear over time.
- **Avoid Sharp Objects:** While the protector is scratch-resistant, extreme pressure or sharp objects can still cause damage.

TROUBLESHOOTING

Here are solutions to common issues you might encounter during or after installation:

- **Persistent Bubbles:** If bubbles remain after using the card to push them out, especially large ones, carefully lift the nearest edge of the protector and reapply it, pushing the air out as you lay it back down. Small bubbles may disappear naturally within 24-48 hours due to the self-healing properties of the TPU material.
- **Protector Not Sticking:** Ensure the screen is thoroughly clean and free of dust or oils before application. Also, verify that you have peeled off the correct "Back 1" (red) layer first to expose the adhesive side of the actual protector. Refer to the installation steps if unsure.
- **Misalignment:** If the protector is misaligned, gently lift it from one edge and carefully reposition it. Do this slowly to avoid stretching the material or introducing dust.

SPECIFICATIONS

Brand	Lamshaw
Compatible Devices	Kuizil K21 1.69" Touch Screen Smartwatch
Material	TPU (Thermoplastic Polyurethane)
Special Features	Screen Protector, Shock Absorbent, Anti-Shatter, Anti-Scratch, High Transparency, High Sensitivity, Bubble Self-Healing
Screen Size Compatibility	1.69 Inches
Screen Surface Description	Glossy
Number of Items	6 (Pack)
