4. Maintenance

4.1 Cleaning

To maintain the remote control's functionality and appearance:

- Wipe the remote control with a soft, dry cloth.
- For stubborn dirt, lightly dampen the cloth with water or a mild, non-abrasive cleaner.
- Avoid using harsh chemicals, solvents, or abrasive materials, as these can damage the remote's surface or internal components.

4.2 Battery Replacement

Replace batteries when the remote control's response becomes sluggish or stops working. Always replace both batteries at the same time with new AAA alkaline batteries. Do not mix old and new batteries, or different types of batteries.

5. Troubleshooting

If you encounter issues with your remote control, refer to the following common troubleshooting steps:

- **Remote Not Responding:**

    - Check if the batteries are inserted correctly with the correct polarity (+/-).
    - Replace the batteries with new ones.
    - Ensure there are no obstructions between the remote control and the TV's infrared sensor.
    - Verify that the remote is pointed directly at the TV's IR sensor.

- **Specific Buttons Not Working:**

    - Clean the remote control, especially around the problematic buttons, to remove any dirt or debris that might be causing them to stick or malfunction.
    - If only certain buttons are unresponsive after cleaning and battery replacement, the remote may be damaged.

- **Short Operating Range:**

    - Replace the batteries, as low battery power can reduce the remote's effective range.
    - Ensure no strong light sources (like direct sunlight or bright fluorescent lights) are interfering with the TV's IR sensor.
