Arebos AR-HE-SE3S

Arebos Heavy-Duty Corner Shelving Unit (Set of 3)

Model: AR-HE-SE3S

1. INTRODUCTION

Thank you for choosing the Arebos Heavy-Duty Corner Shelving Unit. This manual provides essential information for the safe and efficient assembly, operation, and maintenance of your new storage system. Designed for versatility and durability, these units are ideal for organizing spaces such as pantries, cellars, garages, or offices. Each unit features a robust metal frame and five adjustable MDF shelves, offering a total load capacity of 875 kg per unit.

2. SAFETY INSTRUCTIONS

- Read all instructions carefully before attempting assembly or use.
- Ensure the shelving unit is assembled on a flat, stable, and level surface.
- Do not exceed the maximum load capacity of 175 kg per shelf or 875 kg per unit. Distribute weight evenly across all shelves.
- Always use the included plastic feet to protect your flooring from scratches.
- For enhanced stability, especially with heavy loads or in areas prone to seismic activity, consider anchoring the unit to a wall (anchoring hardware not included).
- Keep children and pets away from the assembly area to prevent accidents.
- Wear appropriate safety gear, such as gloves, during assembly to avoid cuts or pinches.
- Avoid exposing the MDF shelves to excessive moisture, as this can cause damage.

3. PACKAGE CONTENTS

Verify that all components are present before beginning assembly. The package should contain:

- 3 x Heavy-Duty Shelving Units (each unit includes):
 - Metal uprights and crossbars
 - 5 x MDF shelves
 - Plastic feet
 - Central crossbar supports for each shelf

If any parts are missing or damaged, please contact Arebos customer service.

4. SETUP AND ASSEMBLY

The Arebos shelving unit features a boltless plug-in system for quick and easy assembly. A rubber mallet is recommended to ensure all connections are fully seated.

4.1. Required Tools

- Rubber Mallet (recommended)
- Gloves (recommended)

4.2. Assembly Steps

1. **Unpack Components:** Carefully remove all parts from the packaging and lay them out on a clean, flat surface.
2. **Assemble Uprights:** Connect the vertical metal uprights by slotting them together. Ensure the tabs are fully engaged into the slots. Use a rubber mallet to gently tap them into place for a secure fit.
3. **Attach Crossbars:** For each shelf level, attach the horizontal crossbars to the uprights. The crossbars have tabs that slot into the uprights. Ensure they are level and securely fastened.
4. **Insert Central Crossbar:** For added stability, insert the central crossbar support for each shelf level.
5. **Place MDF Shelves:** Carefully place the MDF shelves onto the assembled crossbar frames.
6. **Attach Plastic Feet:** Install the plastic feet onto the bottom of the uprights to protect your floor.
7. **Final Check:** Once assembled, gently shake the unit to ensure all connections are secure and the unit is stable.

Configuration Options: The shelving unit can be assembled as a single tall unit or split into two half-height workbenches. Shelf heights are adjustable to suit your storage needs.

Image 2: Details of the robust connectors, adjustable shelf spacing, and steel supports, highlighting the 175 kg per shelf capacity.

5. OPERATING AND USAGE

The Arebos Heavy-Duty Corner Shelving Unit is designed for versatile storage in various environments.

- **Adjustable Shelves:** The height of each shelf can be adjusted to accommodate items of different sizes. Simply unslot the crossbars, reposition them to the desired height, and re-secure.
- **Load Distribution:** Always distribute the weight of items evenly across the shelves to maintain stability and

prevent damage to the unit or its contents.

- **Configuration:** The units can be used individually, combined to form a larger storage system, or configured as corner units to maximize space utilization. They can also be split into two shorter workbenches.

6. MAINTENANCE

To ensure the longevity and optimal performance of your Arebos shelving unit, follow these simple maintenance

guidelines:

- **Cleaning:** Wipe the metal frame and MDF shelves with a dry cloth to remove dust and debris. For stubborn dirt, a slightly damp cloth can be used, followed immediately by a dry cloth to prevent moisture damage to the MDF.
 - **Regular Inspection:** Periodically check all connections to ensure they remain tight and secure. Re-tap with a rubber mallet if any connections feel loose.
 - **Avoid Moisture:** Protect the MDF shelves from prolonged exposure to water or high humidity, which can cause swelling or warping.
-

7. TROUBLESHOOTING

If you encounter any issues with your shelving unit, refer to the following common solutions:

- **Unit feels unstable:**
 - Ensure all plug-in connections are fully engaged. Use a rubber mallet to tap them firmly into place.
 - Verify that the unit is placed on a completely level surface. Adjust if necessary.
 - Consider anchoring the unit to a wall for maximum stability, especially if it is heavily loaded or tall.
 - **Difficulty during assembly:**
 - A rubber mallet is highly recommended to help secure the connections.
 - Having a second person assist with holding components can make assembly easier.
 - **Missing or damaged parts:**
 - Carefully re-check the packaging for any small components.
 - Contact Arebos customer support with your model number (AR-HE-SE3S) and purchase details for assistance.
-
