## 4. SETUP

### 4.1 Charging the Camera

Before first use, fully charge the camera using the provided USB Type-C cable. Connect the cable to the camera's charging port and a compatible USB power source. The charging indicator light will show the charging status.

### 4.2 Inserting the SD Card

Locate the SD card slot on the side of the camera. Gently insert the 32GB SD card until it clicks into

place. Ensure the card is inserted in the correct orientation.

#### 4.3 Installing Print Paper

1. Push up the part with the lens to open the paper slot.
2. Insert a roll of thermal print paper into the slot, ensuring the paper feeds out from the top.
3. Close the camera securely.

## 6. MAINTENANCE

### 6.1 Replacing Print Paper

When the current paper roll is depleted, follow the steps in Section 4.3 to install a new roll. Ensure you use compatible thermal print paper.

### 6.2 Battery Care

Recharge the camera when the battery indicator is low. Avoid fully draining the battery frequently to prolong its lifespan. If the camera is not used for an extended period, charge it periodically.

### 6.3 Cleaning the Camera

Use a soft, dry cloth to clean the exterior of the camera. Do not use liquid cleaners or abrasive materials. For the lens, use a specialized lens cleaning cloth.

### 6.4 Storage

Store the camera in a cool, dry place away from direct sunlight and extreme temperatures. Remove the SD card if storing for very long periods.

## 7. TROUBLESHOOTING

- **Camera not turning on:** Ensure the battery is charged. Connect the camera to the charger and try again.
- **Photos not printing:** Check if there is enough thermal paper installed correctly (refer to Section 4.3). Ensure the print function is enabled in settings if you are not using instant print mode.
- **Poor print quality:** Ensure the paper is installed correctly. The print quality is black-and-white thermal; for higher quality color images, view them on the screen or transfer from the SD card.
- **SD card error:** Reinsert the SD card. If the issue persists, try a different compatible SD card. Ensure the card is not full.
- **App connection issues:** Ensure Bluetooth is enabled on both the camera and your smartphone. Restart both devices and try connecting again.
