Image Description: This image displays the product's dimensions (30mm x 61mm x 93mm) and weight (126g/4.4oz). Below the camera, the included accessories are shown: a long clip, a short clip, a USB cable, a charge plug, and a user manual.

SETUP

1. Charging the Device

Connect the Type-C USB cable to the camera and the power adapter. Plug the adapter into a power outlet. The device will fully charge in approximately 4 hours. The indicator light will show charging status.

2. Powering On/Off

Press and hold the red Power On/Off button located on the side of the camera for a few seconds to turn the device on or off.

3. Attaching Clips

The CAMMHD C8 comes with two 360° rotatable clips (long and short) for various mounting preferences. Align the clip with the slot on the back of the camera and slide it into place until it clicks securely. To remove, press the release tab and slide the clip off.

4. Connecting to Computer/Phone

Use the provided Type-C USB cable to connect the camera to a computer for data transfer. For mobile devices, an OTG adapter (not included) may be required.

OPERATING INSTRUCTIONS

1. Recording Video

Press the dedicated Video Button (usually marked with a camera icon) to start video recording. Press it again to stop. The 2.0-inch display will show recording status and allow for local playback.

Video Description: This video demonstrates the CAMMHD C8 1440P 2K HD Body Camera in action, showcasing its video recording capabilities and clarity in various environments. It highlights the camera's ability to capture high-quality footage.

2. Recording Audio

Press the Audio Button (usually marked with a microphone icon) to start audio recording. Press it again to stop. The LCD screen will display a microphone icon to indicate audio recording is in progress.

3. Taking Photos

Press the Photo Button (usually marked with a camera icon) to capture still images. A capturing sound will be heard.

4. Night Vision

The C8 features automatic infrared night vision. When ambient light is low, the camera will automatically switch to IR mode. You can also manually activate or deactivate night vision through the menu settings.

Image Description: The image illustrates the camera's automatic infrared night vision feature. A street scene at night is depicted, with a car and two pedestrians clearly visible due to the camera's highly sensitive chip and 170° wide-angle view. Icons for WDR, FHD, and 170° are also shown.

5. LED and Warning Lights

The camera is equipped with LED and warning lights that can be activated as needed, for example, in emergency situations or to provide visibility.

6. Local Playback & Preview

Use the 2.0-inch display to review recorded videos, photos, and audio directly on the camera. This allows for quick verification of captured media.

7. Data Encryption & Password Protection

To protect your data, you can set a 6-digit password composed of numbers and letters. This prevents unauthorized access, modification, or deletion of your recordings. Access this feature through the camera's menu settings.

8. Motion Detection

Activate motion detection in the settings. The camera will automatically begin recording when movement is detected within its field of view, conserving battery and storage space.

9. Car Dash Cam Mode

The CAMMHD C8 can function as a dash cam. Enable 'Car Dash Cam Mode' in the settings. For optimal use, a compatible car suction cup mount (sold separately) is recommended.

Video Description: This video provides a demonstration of how to use the CAMMHD C8 with its small clips, showing the ease of attachment and rotation for various mounting positions on clothing or gear.

MAINTENANCE

- **Cleaning:** Use a soft, dry cloth to clean the camera lens and body. Avoid abrasive materials or harsh chemicals.
- **Storage:** Store the camera in a cool, dry place away from direct sunlight and extreme temperatures.
- **Battery Care:** For optimal battery life, fully charge the device before extended storage and recharge it every few months if not in regular use.
- **Data Management:** Regularly transfer important files to a computer and delete unnecessary recordings from the camera to free up storage space.

TROUBLESHOOTING

- **Camera Not Powering On:** Ensure the battery is charged. Connect to the charger and try again.
- **Recording Issues:** Check available storage space. Ensure the camera is not in a low-power state.
- **Poor Video Quality:** Verify the selected recording resolution in the settings. Ensure the lens is clean.
- **Data Transfer Problems:** Ensure the USB cable is securely connected to both the camera and the computer. Try a different USB port or cable.
- **Forgotten Password:** Refer to the user manual for instructions on resetting or recovering your password.
