## 7. TROUBLESHOOTING

If you encounter any issues with your storage organizer, refer to the following common problems and solutions:

Unit feels wobbly or unstable.	Loose fasteners; uneven floor; unit not wall-mounted.	Ensure all cam locks and screws are fully tightened. Place the unit on a level surface. Install the anti-toppling wall kit as instructed.
Parts do not align during assembly.	Incorrect orientation of panels; dowel pins not fully inserted.	Double-check the assembly diagram for correct panel orientation. Ensure dowel pins are fully seated in their holes before attempting to connect panels.
