Hikity 406e7cba-efcf-4ebd-9b06-0a129022420e

Hikity 2+64G Android 13 Autoradio User Manual

Model: 406e7cba-efcf-4ebd-9b06-0a129022420e
For Seat Ibiza 6J (2009-2013)

1. INTRODUCTION

This manual provides detailed instructions for the installation, operation, and maintenance of your Hikity 2+64G Android 13 Autoradio. Please read this manual thoroughly before using the product to ensure proper function and safety. Keep this manual for future reference.

2. SAFETY INFORMATION

- Ensure the vehicle's ignition is off and the battery is disconnected before installation to prevent electrical short circuits.
- Professional installation is recommended. Incorrect wiring can damage the device or vehicle.
- Do not operate the device in a way that distracts you from driving. Always prioritize road safety.
- Avoid exposing the device to extreme temperatures, direct sunlight for prolonged periods, or excessive moisture.
- Use only specified power cables and accessories.

3. PACKAGE CONTENTS

Verify that all items are present in the package:

- 1 x Android Car Autoradio
- 1 x Power Cable
- 1 x GPS Antenna
- 1 x Rear Camera Connection Cable
- 1 x RCA Cable
- 2 x USB Cables
- 2 x Mounting Brackets
- 4 x Screws
- 1 x Instruction Manual

- 1 x Rear View Camera

5. SETUP AND INSTALLATION

This section provides general guidance for installing the autoradio. Specific vehicle wiring may vary. It is highly recommended to consult a professional for installation.

Installation Steps:

1. **Preparation:** Disconnect the vehicle's battery. Remove the original car stereo and trim panel.
2. **Wiring:** Connect the provided power cable, RCA cables, USB cables, GPS antenna, and rear camera cable to the corresponding ports on the new autoradio. Ensure all connections are secure.
3. **Canbus Connection:** Connect the Canbus decoder to integrate with the vehicle's original systems, such as steering wheel controls.
4. **Mounting:** Attach the mounting brackets to the autoradio and secure it into the dashboard opening.

5. **Rear Camera Installation:** Install the rear camera at the back of the vehicle, typically near the license plate. Route the camera cable to the autoradio and connect it.
6. **Final Check:** Reconnect the vehicle battery. Turn on the ignition and test all functions of the autoradio.

6. OPERATING INSTRUCTIONS

6.1. Initial Setup

- Upon first power-on, the system may guide you through initial language and time zone settings.
- Connect to a Wi-Fi network or mobile hotspot to enable online features and download updates.

6.2. Wireless CarPlay & Android Auto

Connect your smartphone to the autoradio via USB, Wi-Fi, or Bluetooth to access CarPlay or Android Auto functionalities. This allows for navigation, hands-free calls, messaging, and music streaming directly from your phone's interface on the car stereo screen. Wireless Android Auto is supported.

6.4. Bluetooth Hands-Free & Audio Streaming

Pair your smartphone via Bluetooth for hands-free calling, phonebook synchronization, and audio streaming. The integrated Hi-Fi function and TDA7388 power amplifier chip ensure high-fidelity audio output.

6.5. FM/RDS Radio

Access the FM/RDS radio tuner. The system supports 30 preset stations and allows for automatic or manual station searching.

6.6. Steering Wheel Control (SWC)

With the integrated Canbus decoder, the autoradio can synchronize with your vehicle's original steering wheel controls, allowing you to manage audio and other functions without taking your hands off the wheel.

6.7. Rear Camera Input

When the vehicle is shifted into reverse, the display automatically switches to the rear camera view, providing assistance for parking and maneuvering.

7. MAINTENANCE

- **Cleaning:** Use a soft, dry cloth to clean the screen and exterior. Avoid abrasive cleaners or solvents.
- **Software Updates:** Periodically check for software updates via Wi-Fi to ensure optimal performance and access to new features.
- **Avoid Liquids:** Do not allow liquids to enter the device, as this can cause damage.

8. TROUBLESHOOTING

Problem	Possible Cause	Solution
No power	Incorrect wiring, blown fuse, vehicle battery issue	Check power connections, inspect vehicle fuses, ensure battery is charged. Consult a professional if needed.
No sound	Speaker wires disconnected, volume too low, incorrect audio settings	Verify speaker connections, increase volume, check audio output settings.
Bluetooth not connecting	Bluetooth off on device or phone, pairing mode not active	Ensure Bluetooth is enabled on both devices, put the autoradio in pairing mode, and try re-pairing.
GPS signal weak/lost	GPS antenna obstructed or improperly installed	Ensure the GPS antenna has a clear view of the sky and is securely connected.
Steering wheel controls not working	Canbus decoder not connected or configured correctly	Check Canbus connections and ensure proper configuration in the system settings.
