## SETUP

The Legami Erasable Gel Pen is ready for use right out of the packaging. Simply remove the protective cap from the writing tip. No assembly or special preparation is required. The heat-sensitive ink is pre-filled and ready to write.

## OPERATING INSTRUCTIONS

---

## Writing

To write, hold the pen as you would any standard pen. Apply light to moderate pressure to the paper. The 0.7 mm tip provides a smooth and consistent line.

## Erasing

To erase, use the clear ball located at the end of the pen. Rub the ball firmly over the ink you wish to remove. The friction generated by rubbing heats the ink, causing it to become transparent and effectively disappear.

The eraser ball is designed not to wear out or damage the paper, ensuring clean corrections every time.

# Send a secret message!

3, 2, 1 Let's go!

## Special Feature: Secret Messages

Due to the heat-sensitive nature of the ink, it can reappear if exposed to very cold temperatures (below  $-10^{\circ}\text{C}$ ). This unique characteristic allows for fun "secret messages" that can be revealed by placing the written paper in a freezer for a few minutes.

## MAINTENANCE

- **Storage:** Store the pen at room temperature. Avoid prolonged exposure to direct sunlight or extreme heat, as this can cause the ink to fade or disappear prematurely.
- **Cleaning:** If the pen body becomes dirty, wipe it gently with a soft, dry cloth. Do not use harsh chemicals or abrasive materials.
- **Ink Refills:** This model is designed for long-lasting use. Information regarding specific ink refills is not provided, but general gel pen refills may be compatible.

## TROUBLESHOOTING

Issue	Possible Cause / Solution
Ink not flowing smoothly.	The pen tip might be dry. Try scribbling on a scrap piece of paper or gently shaking the pen.
Ink does not erase completely.	Ensure sufficient friction is applied with the eraser ball. Some paper types or surfaces may react differently.
Erased ink reappears.	This is a characteristic of heat-sensitive ink. The ink may reappear if exposed to very cold temperatures (below -10°C). Store the pen and written documents at room temperature.
