Setup and Installation

These brush heads are designed for easy replacement on your compatible electric spin scrubber. Follow these steps to attach a brush head:

1. Ensure your electric spin scrubber is turned off and disconnected from any power source.
2. If a brush head is currently attached, firmly grasp the brush head and twist counter-clockwise to remove it.
3. Select the desired brush head for your cleaning task.
4. Align the new brush head with the attachment point on the spin scrubber.
5. Push the brush head onto the attachment point and twist clockwise until it clicks securely into place.
6. Gently pull on the brush head to confirm it is firmly attached before use.

Operating Instructions

Once the desired brush head is securely attached to your electric spin scrubber, you can begin cleaning. Refer to your spin scrubber's main instruction manual for specific power and speed settings.

- **Small Flat Brush:** Ideal for smaller flat surfaces, grout lines, and tight spaces.
- **Large Flat Brush:** Best for larger flat surfaces such as bathroom floors, walls, and shower doors.
- **Corner Brush:** Specifically designed to reach into corners, crevices, and around fixtures.
- **Dome Brush:** Excellent for curved surfaces like sinks, bathtubs, and toilet bowls.

Always test the brush head on an inconspicuous area first to ensure it does not scratch or damage the surface. Apply appropriate cleaning solutions as recommended for the surface you are cleaning.

Maintenance and Care

Proper maintenance extends the life of your brush heads and ensures optimal cleaning performance:

- **Cleaning Brush Heads:** After each use, remove the brush head from the spin scrubber. Rinse the brush head thoroughly under running water to remove any dirt, debris, or cleaning solution residue.
- **Drying:** Allow brush heads to air dry completely before storing them. Store in a dry, well-ventilated area.
- **Inspection:** Regularly inspect brush bristles for wear, damage, or excessive flattening. Replace brush heads when bristles become worn or ineffective to maintain cleaning efficiency.
- **Storage:** Store brush heads separately from harsh chemicals to prevent material degradation.

Troubleshooting

If you encounter issues with your Berscob Replaceable Brush Heads, consider the following:

- **Brush head not attaching securely:** Ensure the brush head is correctly aligned with the spin scrubber's attachment point and twisted clockwise until it clicks. Check for any debris obstructing the connection.
- **Reduced cleaning effectiveness:** Inspect the bristles for wear. Worn or flattened bristles will reduce cleaning power and indicate that the brush head needs replacement. Ensure you are using the appropriate brush head for the surface and type of dirt.
- **Unusual noise or vibration:** Remove and reattach the brush head to ensure it is seated correctly. If the issue persists, inspect the brush head for any damage or manufacturing defects.
