

MotionBlinds CM-19

Coulisse Motion Blinds Domotica Box RS485 User Manual

Model: CM-19 | Brand: MotionBlinds

1. INTRODUCTION

The Coulisse Motion Blinds Domotica Box RS485 (CM-19) is designed for the seamless integration of motorized window blinds with existing home and building automation networks and systems. This device acts as a bridge, allowing for advanced control and automation of your MotionBlinds motorized window coverings. It is compatible with a wide variety of wired and battery-powered motors and controls used in residential, commercial, and hospitality settings.

2. PRODUCT OVERVIEW

The CM-19 Domotica Box is a compact device that facilitates communication between your motorized blinds and a central automation system. It features a minimalist design with essential controls and connectivity ports.

Figure 2.1: Front View. This image displays the front of the CM-19 Domotica Box, highlighting the control buttons for scene selection, adjustment, pairing, and unpairing of devices.

Figure 2.2: Rear View. This image shows the back of the CM-19 Domotica Box, featuring a micro USB port for power and two RJ45 ports for network or RS485 connections.

Figure 2.3: Key Features and Dimensions. This diagram illustrates the compact size of the Domotica Box (approximately 3.11 inches) and highlights its primary functions: seamless integration of motorized blinds and power compatibility with any standard USB charger.

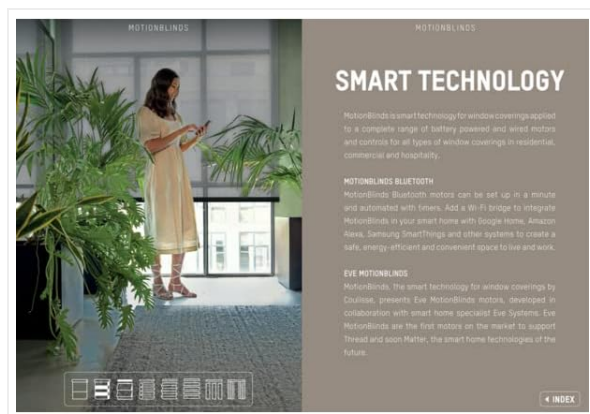

Figure 2.4: Smart Technology Overview. This image provides an overview of the MotionBlinds smart technology ecosystem, detailing how Bluetooth motors can be set up quickly and integrated with smart home systems like Google Home and Amazon Alexa via an optional Wi-Fi bridge. It also emphasizes the privacy aspect of local data storage.

3. SAFETY INFORMATION

Please read and understand all safety instructions before installing and operating the Domotica Box. Failure to follow these instructions may result in electric shock, fire, or serious injury.

- Ensure the device is powered by a compatible USB charger (5V DC, minimum 1A) to prevent damage.
- Do not expose the device to water, moisture, or extreme temperatures.
- Do not attempt to open, modify, or repair the device. Refer all servicing to qualified personnel.
- Keep the device away from direct sunlight and heat sources.
- Ensure proper ventilation around the device.

4. SETUP

4.1 Powering the Domotica Box

1. Locate a suitable power outlet near your desired installation location.
2. Connect a standard USB charger (not included) to the micro USB port on the back of the CM-19 Domotica Box.
3. Plug the USB charger into the power outlet. The device will power on automatically.

4.2 Integration with Home Automation Systems

The CM-19 Domotica Box is designed for seamless integration with home and building automation networks using RS485 communication. Consult your home automation system's documentation for specific connection and configuration procedures.

4.3 Optional Smart Home Connectivity (via Wi-Fi Bridge)

For connecting Bluetooth-powered MotionBlinds to popular smart home systems like Google Home, Amazon Alexa, and others, an optional MotionBlinds Wi-Fi bridge is required. This bridge facilitates communication between your blinds and the smart home ecosystem.

- Install the MotionBlinds Wi-Fi bridge according to its specific instructions.
- Follow the setup steps within the MotionBlinds application to connect your blinds to the Wi-Fi bridge and subsequently to your preferred smart home system.

4.4 Smartphone App Setup

To control your blinds with a smartphone, download the official MotionBlinds app from your device's app store. After installation, follow the in-app instructions to pair your blinds and configure settings. This process typically involves a few easy steps.

5. OPERATING INSTRUCTIONS

5.1 Controlling Blinds via Smartphone App

Once your blinds are paired with the MotionBlinds app, you can control their movement (open, close, stop) directly from your smartphone. The app provides an intuitive interface for managing individual blinds or groups of blinds.

5.2 Programming Timers and Automation

The MotionBlinds app allows you to program timers directly into the motor, enabling automated operation of your blinds. This feature allows blinds to move to pre-set positions at scheduled times, providing convenience and energy efficiency.

- Open the MotionBlinds app and navigate to the timer or automation section.

- Create new schedules by selecting specific blinds, desired positions, and activation times.
- Save your programmed timers. The blinds will then operate on autopilot according to your settings.

Note: All data and intelligence related to programmed timers and blind positions are stored locally on the motor, not in the cloud, to ensure user privacy.

6. MAINTENANCE

The Coulisse Motion Blinds Domotica Box CM-19 requires minimal maintenance.

- **Cleaning:** To clean the exterior of the device, use a soft, dry cloth. For minor spots, a slightly damp cloth can be used. Do not use harsh chemicals, abrasive cleaners, or excessive moisture.
- **Product Care Instructions:** Spot Clean.
- Ensure the device is kept free from dust and debris to maintain optimal performance.

7. TROUBLESHOOTING

If you encounter issues with your Coulisse Motion Blinds Domotica Box, please refer to the following common troubleshooting steps. For more complex issues, contact customer support.

- **Device not powering on:** Ensure the USB cable is securely connected to both the Domotica Box and a working USB charger. Try a different USB charger and cable.
- **Blinds not responding:** Verify that the Domotica Box is powered on and properly connected to your home automation system. Check the pairing status of your blinds within the MotionBlinds app.
- **App connectivity issues:** Ensure your smartphone has a stable internet connection. Restart the MotionBlinds app. If using a Wi-Fi bridge, ensure it is properly configured and connected to your network.
- **Intermittent control:** Check for any potential sources of interference near the Domotica Box or your blinds. Ensure the device is within range of your blinds (if using Bluetooth directly).

8. SPECIFICATIONS

Attribute	Detail
Brand	MotionBlinds
Manufacturer	Coulisse
Model Number	CM-19
ASIN	B0BWSJ4MBF
UPC	655457900597
Color	Black
