MAINTENANCE AND CARE

Proper care will ensure the longevity of your miniatures and game components.

- **Cleaning:** Gently wipe miniatures with a soft, dry cloth to remove dust. Avoid harsh chemicals or abrasive materials.
- **Storage:** Store miniatures in a cool, dry place away from direct sunlight and extreme temperatures. Consider using foam-lined cases to prevent damage during transport or storage.
- **Handling:** Handle miniatures by their bases to avoid damaging painted surfaces or delicate parts.
- **Painting:** If painting, use acrylic paints designed for miniatures. Apply thin coats to preserve detail. A protective varnish can be applied after painting to prevent chipping.

TROUBLESHOOTING

Here are solutions to common issues encountered during assembly or gameplay:

- **Parts Not Fitting:** Ensure you are using the correct parts for the intended miniature and pose. Sometimes, minor mold lines or excess plastic (flash) can prevent a snug fit; carefully trim these with a hobby knife.
- **Miniature Instability:** If a miniature is wobbly after assembly, ensure the adhesive has fully cured. For persistent issues, consider reinforcing the connection with a small pin (pinning) or using a stronger adhesive.
- **Missing Components:** Double-check the box contents against the "What's in the Box" list. If a component is genuinely missing, contact Atomic Mass Games customer support.
- **Gameplay Questions:** Refer to the official Star Wars: Legion rulebook and frequently asked questions (FAQ) documents available on the Atomic Mass Games website for rules clarifications.
