GROWNSY B12H

GROWNSY B12H Multifunctional Baby Scale Instruction Manual

Model: B12H | Brand: GROWNSY

1. Introduction

The GROWNSY B12H Multifunctional Baby Scale is designed to provide accurate weight and height measurements for babies, pets, and adults up to 330 lbs. Featuring a high-precision sensor, smart chip, and multiple unit options, this scale ensures reliable readings. Its detachable design and hold function make it convenient for monitoring growth and development.

2. Product Features

- **Accurate and Precise Measurement:** Built-in high-precision sensor and smart chip for reliable weight and height readings.
- **Large Capacity:** Weighs babies, puppies, cats, and adults up to 330 lbs.
- **Safety and Comfort:** Patented design with non-slip, hard-wearing rubber feet and a 27-inch platform for height measurement.
- **Hold Function:** Automatic or manual hold function to obtain accurate measurements even with movement.
- **Easy to Use and Store:** Touchscreen button, auto-off function after 2 minutes of inactivity, and detachable design for convenient assembly, use, and storage.
- **Multiple Units:** Five display units available: lb:oz, oz, lb, g, and kg.

3. Setup Instructions

The GROWNSY B12H Baby Scale is designed for simple, tool-free assembly.

1. **Unpack Components:** Carefully remove the scale base and the two tray pieces from the packaging.
2. **Install Batteries:** Open the battery compartment on the underside of the scale base and insert the three AAA batteries provided.
3. **Assemble the Tray:** Connect the two tray pieces by aligning their edges and snapping them together. Ensure they are securely fastened.
4. **Attach Tray to Base:** Align the assembled tray with the central slot on the scale base. Gently push down until it clicks into place. The tray should be firmly attached to the base.
5. **Secure the Tray:** Flip the entire assembly over and twist the locking mechanisms on the underside of the scale to secure the tray.

4. Operating Instructions

1. **Power On:** Press the power button (usually marked with a power symbol) to turn on the scale. The LED screen will light up.
2. **Select Unit:** Press the 'UNIT' button to cycle through the available measurement units (lb:oz, oz, lb, g, kg) until your desired unit is displayed.
3. **Tare Function (Zeroing):** If using a blanket or towel on the scale, place it on the tray before turning on the scale or press the 'TARE' button after placing it. This will zero out the weight of the blanket, ensuring only the subject's weight is measured.
4. **Weighing:** Gently place the baby or pet on the center of the tray. For adults, remove the tray and step directly onto the base. Allow a few seconds for the reading to stabilize.
5. **Hold Function:** If the subject is moving, press the 'HOLD' button. The scale will average the weight fluctuations and display a stable reading. This reading will remain on the screen even after the subject is removed.
6. **Height Measurement:** The tray features a built-in ruler for measuring height up to 27 inches (69 cm). Position the baby or pet with their head at one end and note the measurement at their feet.
7. **Power Off:** The scale will automatically turn off after 2 minutes of inactivity to conserve battery. You can also long-press the power button to manually turn it off.

Image: The scale offers five precise units for convenient and reliable readings.

Image: The 27-inch measurement feature allows for weighing and measuring in one step.

5. Maintenance

- **Cleaning:** Wipe the scale surface with a soft, damp cloth. Do not use abrasive cleaners or immerse the scale in water.
- **Storage:** Store the scale in a cool, dry place. The detachable tray can be separated for more compact storage.
- **Battery Replacement:** Replace batteries when the low battery indicator appears on the display. Use 3 AAA batteries.

6. Troubleshooting

- **Inaccurate Readings:**
  - Ensure the scale is placed on a hard, flat, and stable surface. Avoid carpets or uneven ground.
  - Do not let any part of the subject touch other objects while being weighed.

- Use the 'TARE' function to zero out any blankets or clothing before weighing.
- Use the 'HOLD' function for moving subjects to get a stable average weight.

- **Display Not Working:**
  - Check if the batteries are correctly installed and not depleted. Replace if necessary.
  - Ensure the scale is powered on.
- **Error Message ('ERR'):**
  - This may indicate an overload. Ensure the weight does not exceed 330 lbs (150 kg).
  - Remove the weight and restart the scale.

7. Specifications

Feature	Detail
Model	B12H
