3. SETUP GUIDE

3.1. Installing the SIM Card and Battery

1. **Remove the Back Cover:** Gently pry open the back cover of the phone.
2. **Insert SIM Card(s):** The phone supports Dual SIM (Nano SIM). Locate the SIM card slots. Insert your Nano SIM card(s) into the designated slots with the gold contacts facing down. Ensure they are securely seated.
3. **Insert MicroSD Card (Optional):** If you wish to expand storage, insert a MicroSD card (up to 32GB) into the dedicated slot.
4. **Insert the Battery:** Place the Lithium-ion battery into the battery compartment, ensuring the contacts align with those on the phone.
5. **Replace the Back Cover:** Carefully snap the back cover into place until it is secure.

3.2. Charging the Phone

The uleway T2301 offers two charging methods:

- **Using the Charging Dock:** Connect the USB Type-C charging cable to the charging dock and then to a power adapter. Place the phone into the charging dock. The phone will stand upright and begin charging. This method is convenient for regular charging.
- **Direct USB Type-C Connection:** Connect the USB Type-C charging cable directly to the phone's

Type-C port and then to a power adapter. The reversible Type-C connector allows for easy insertion.

A full charge typically takes a few hours. The battery indicator on the screen will show charging status.

- Avoid extreme temperatures.
- Do not fully discharge the battery regularly; charge it before it runs completely empty.
- Use only the original charger and cable provided.

5.2. Cleaning

Wipe the phone with a soft, dry cloth. Avoid using harsh chemicals or abrasive materials, which can damage the screen or casing.

5.3. Water Resistance

The phone is designed with a degree of water resistance. However, it is not fully waterproof. Avoid submerging the phone in water or exposing it to heavy rain. If the phone gets wet, power it off immediately and allow it to dry completely before use.

6. TROUBLESHOOTING

If you encounter issues with your uleway T2301, please refer to the following common solutions:

Problem	Possible Solution
Phone does not power on	Ensure the battery is correctly installed and charged. Connect the charger and try again.
Cannot make or receive calls	Check if the SIM card is properly inserted and activated. Verify network signal strength. Ensure airplane mode is off.
Poor call quality	Move to an area with better network coverage. Check the earpiece/speaker for obstructions.
Battery drains quickly	Reduce screen brightness. Close unused applications. Ensure the phone is not in an area with poor signal, which can increase battery usage.
SOS function not working	Verify that emergency contacts are correctly set up in the SOS settings. Ensure the phone has network signal.

If the problem persists, please contact customer support.
