ReplacementScrews Shelf Hex Screws Instruction Manual

Compatible with Target 6 Cube Organizer (Brightroom 13in Cubes)

1. PRODUCT OVERVIEW

This manual provides essential information for the proper use and compatibility of ReplacementScrews Hex Screws, designed specifically for the Target Brightroom 13-inch 6 Cube Organizer Storage Shelf System. These screws are intended as replacement or assembly components to ensure the structural integrity of your shelving unit.

Figure 1: A complete set of eight zinc-plated hex screws, essential for assembling or replacing components in compatible cube organizers.

2. PACKAGE CONTENTS

Each pack contains the following components:

- **Eight (8) Zinc Plated Conformat Furniture Screws:** These screws are approximately 3-1/4 inches long, feature a flat head, and require a hex drive for installation.

Note: A 4mm Allen key is required for assembly but is **not included** in this package. Wooden dowels are also not included.

3. COMPATIBILITY

These hex head screws are specifically designed for compatibility with the **Target Six (2 x 3) Cube Organizer Shelves** that measure approximately 30 inches (H) x 43.8 inches (W) x 14.6 inches (D). It is crucial to verify that your organizer is the **larger 13-inch cube shelf** with thick outer panels, and not the smaller 11-inch system.

Compatible with the following Target Brightroom styles and item numbers:

- **Styles:** BR21-006-013, BR21-006-001, BR21-006-014, BR21-006-003, BR21-006-002
- **Item Numbers:** 002-11-0456, 002-11-0057, 002-11-0455, 002-11-0049, 002-11-0461

Please note: These are compatible assembly screws and are not Original Equipment Manufacturer (OEM) parts.

4. SETUP AND INSTALLATION

These screws are used for the assembly or re-assembly of the compatible Target Brightroom 13-inch 6 Cube Organizer. Follow the original assembly instructions provided with your cube organizer, replacing any damaged or missing screws with these ReplacementScrews components.

1. **Identify Screw Locations:** Refer to your organizer's assembly manual to locate the designated screw points.
2. **Prepare Tools:** Ensure you have a 4mm Allen key (hex wrench) readily available.

3. **Insert Screws:** Align the screw with the pre-drilled hole in the organizer panels.
4. **Tighten Screws:** Use the 4mm Allen key to turn the screw clockwise until it is firmly seated. Do not overtighten, as this may damage the particle board material of the organizer.

Ensure all eight screws are used for complete assembly to maintain the structural integrity of the 6-cube organizer.

5. MAINTENANCE

These zinc-plated screws are designed for durability. No specific maintenance is required for the screws themselves. However, it is recommended to periodically check the tightness of all screws in your cube organizer to ensure stability and prevent loosening over time. If any screw appears loose, gently retighten it with a 4mm Allen key.

6. TROUBLESHOOTING

- **Screws do not fit:**
 - Verify that your Target cube organizer is the 13-inch cube size, not the 11-inch. These screws are specifically for the larger model.
 - Confirm the model and style numbers of your organizer against the compatibility list in Section 3.
- **Screws are difficult to tighten:**
 - Ensure you are using the correct tool (4mm Allen key).
 - Check that the screw is properly aligned with the pre-drilled hole. Do not force the screw.
- **Organizer feels wobbly after assembly:**
 - Ensure all eight screws are installed and fully tightened.
 - Verify that all panels of the organizer are correctly aligned and seated.
