QEEIG FS015

QEEIG Floating Shelves Instruction Manual

Model: FS015 | Brand: QEEIG

PRODUCT OVERVIEW

The QEEIG Floating Shelves (Model FS015) are designed to add functional storage and decorative appeal to various rooms in your home. Crafted from Medium Density Fiberboard (MDF) with a durable finish, these shelves feature an invisible bracket system for a clean, minimalist look. Each shelf is capable of holding up to 25 lbs, making them suitable for displaying books, decor, toiletries, or kitchen essentials. This set includes three 16-inch black shelves, perfect for creating versatile storage solutions in bathrooms, bedrooms, kitchens, and living areas.

SAFETY INFORMATION

- **Weight Limit:** Do not exceed the maximum weight limit of 25 lbs per shelf. Overloading can cause the shelves to detach from the wall, leading to damage or injury.
- **Secure Mounting:** Ensure shelves are securely mounted to the wall using appropriate hardware for your wall type

(wood studs, concrete, or drywall anchors). Improper installation can result in shelves falling.

- **Wall Type:** Always identify your wall type before installation and use the correct anchors and screws. If unsure, consult a professional.
- **Children and Pets:** Keep small children and pets away from the installation area during assembly. Do not allow children to climb on or hang from the shelves.
- **Regular Check:** Periodically check the shelves for stability and tighten any loose screws or connections.

For detailed safety guidelines, please refer to the included instruction manual.

PACKAGE CONTENTS

Verify that all components are present and undamaged before beginning assembly.

Component	Quantity	Description
MDF Boards	3	Floating shelf panels (15.7"W x 6.7"D x 1.5"H)
Metal Brackets	3	Invisible wall mounting hardware
Hardware Kits	1	Includes screws, anchors, and a mini-level
Instructions	1	Detailed assembly guide

SETUP AND INSTALLATION

Follow these steps carefully to ensure proper and secure installation of your QEEIG Floating Shelves.

1. Prepare the Wall:

Choose a suitable location on your wall. Use a stud finder to locate wood studs if available, as direct fastening to studs provides the strongest support. If mounting to drywall without studs or to brick/concrete, ensure you have the correct anchors.

2. Mark Hole Locations:

Hold the metal bracket against the wall at your desired height. Use the included mini-level to ensure it is perfectly horizontal. Mark the positions of the screw holes on the wall with a pencil. For optimal support, the brackets are designed with 16-inch screw spacing to align with standard gypsum board studs.

3. Drill Pilot Holes:

Drill pilot holes at the marked locations. The drill bit size will depend on your wall material and the type of anchors you are using. For wood studs, a smaller pilot hole is needed. For drywall or concrete, larger holes for anchors will be required.

4. Install Anchors (if needed):

If not drilling into wood studs, insert the appropriate wall anchors into the pilot holes. Tap them gently with a hammer until they are flush with the wall surface.

5. Mount the Bracket:

Align the metal bracket with the drilled holes (or installed anchors) and secure it to the wall using the provided screws. Tighten all screws firmly to ensure the bracket is stable and flush against the wall.

INVISIBLE CLEAN LOOK

Image: The invisible bracket design ensures a seamless appearance once the shelf is installed.

6. Slide the Shelf Board:

Carefully slide the MDF shelf board onto the metal rods of the mounted bracket. The board is hollow and designed to fit snugly over the rods, creating the "floating" effect.

7. Secure the Shelf Board:

Once the board is fully seated, use the short screws provided to fix the board to the bracket from the underside. This prevents the board from sliding off the rods.

OPERATING AND USAGE

These floating shelves are designed for versatile use across various rooms:

- **Display:** Ideal for showcasing decorative items, small plants, photo frames, and collectibles.

- **Storage:** Use in bathrooms for toiletries, in kitchens for spices or small dishes, or in bedrooms for books and personal items.
- **Weight Distribution:** Distribute weight evenly across the shelf surface to prevent undue stress on the mounting points.
- **Suitable Environments:** Perfect for office, bathroom, nursery, kids room, kitchen, living room, bedroom, and study room.

MAINTENANCE

- **Cleaning:** Wipe with a dry cloth to remove dust and light dirt. For stubborn marks, use a slightly damp cloth and dry immediately. Avoid abrasive cleaners or harsh chemicals.
- **Avoid Moisture:** While suitable for bathrooms, avoid prolonged exposure to excessive moisture. Wipe up spills immediately to prevent damage to the MDF material.
- **Sunlight Exposure:** Prolonged direct sunlight may cause fading over time.

TROUBLESHOOTING

Problem	Possible Cause	Solution
---------	----------------	----------

Problem	Possible Cause	Solution
Shelf is wobbly/not secure	Loose screws or incorrect anchors for wall type.	Tighten all screws. Ensure correct anchors were used for your wall material. If not, re-install with appropriate hardware.
Shelf sags under weight	Overloaded or improper installation.	Reduce the weight on the shelf. Verify that the shelf is securely mounted and not exceeding the 25 lbs weight limit.
Shelf board does not slide onto bracket rods easily	Misalignment of the bracket or obstruction.	Ensure the bracket is perfectly level. Check for any debris inside the shelf board's hollow interior or on the bracket rods.

SPECIFICATIONS

- **Material:** Medium Density Fiberboard (MDF)
- **Dimensions (per shelf):** 15.7" (W) x 6.7" (D) x 1.5" (H)
