2. INSTALLATION INSTRUCTIONS

Follow these steps to properly install the replacement water tank handle on your HUMSURE dehumidifier.

1. **Preparation:** Ensure your dehumidifier is unplugged from the power outlet before beginning any installation or maintenance. Remove the water tank from the dehumidifier unit. If the old handle is still attached, carefully remove it by disengaging its attachment points.

2. **Identify Attachment Points:** Locate the designated slots or holes on the top and bottom edges of your dehumidifier's water tank where the handle is designed to connect. The new handle has two small protrusions, one at each end, that fit into these points.
3. **Attach the Top:** Align one end of the new handle with the corresponding attachment point on the top edge of the water tank. Gently push or slide the handle into place until it clicks or feels securely seated.
4. **Attach the Bottom:** While holding the top in place, align the other end of the handle with the attachment point on the bottom edge of the water tank. Apply gentle pressure to snap or slide this end into its slot. Ensure both ends are fully engaged and the handle is firm.
5. **Verify Security:** Once installed, gently pull on the handle to confirm it is securely attached to the water tank and does not wobble or detach easily.
6. **Reinsert Tank:** Carefully slide the water tank with the newly installed handle back into the dehumidifier unit.

3. CARE AND MAINTENANCE

To ensure the longevity and proper function of your water tank handle, follow these simple care guidelines:

- **Cleaning:** Clean the handle periodically with a soft, damp cloth. Avoid using abrasive cleaners, solvents, or harsh chemicals, as these can damage the material.
- **Inspection:** Regularly inspect the handle for any signs of wear, cracks, or damage. If the handle appears compromised, consider replacing it to prevent accidental spills or drops of the water tank.
- **Avoid Overloading:** While the handle is designed for the weight of a full water tank, avoid using it to carry excessive loads or for purposes other than its intended use.
