SETUP AND INSTALLATION

Wiring Diagram

Refer to the following diagram for proper wiring connections. Incorrect wiring can damage the device or your vehicle's electrical system. If you are unsure, consult a professional installer.

Back interface

Image: Back interface of the Hodozy 9310W Car Stereo, detailing connections for power (16-pin), AV input/output, subwoofer output, USB 1/2, radio antenna, microphone input, protocol box plug, and reversing video input.

- **Power Cable:** Connect the yellow wire to the constant 12V power supply, the red wire to the accessory (ACC) 12V power supply, and the black wire to ground.
- **Speaker Wires:** Connect the speaker wires to your vehicle's speakers, ensuring correct polarity for each channel (Front Left, Front Right, Rear Left, Rear Right).
- **Reversing Camera Input:** Connect the reversing camera's video output to the 'Reversing Video Input' port. Connect the camera's power to the vehicle's reverse light circuit.
- **USB Ports:** Use the USB 2.0 ports for media playback, smartphone charging, or connecting a designated USB DVR.
- **AUX Input:** Connect external audio devices via the AUX input.
- **Microphone:** Connect the external microphone for improved call quality during hands-free operation.
- **Radio Antenna:** Connect your vehicle's radio antenna to the 'RADIO ANT' port.

Mounting

Install the mounting brackets to the sides of the car stereo using the provided screws. Slide the unit into the 2 Din opening in your vehicle's dashboard until it clicks into place. Secure the unit using the mounting frame and screws.

OPERATING INSTRUCTIONS

Basic Operations

- **Power On/Off:** Press the power button on the front panel or remote control.
- **Volume Control:** Use the volume knob or buttons on the front panel/remote to adjust the sound level.
- **Touchscreen:** Navigate through menus and functions by touching the 7-inch display.

Wireless CarPlay and Android Auto

This unit supports wireless CarPlay for iPhone and wireless Android Auto for Android phones, allowing seamless integration of your smartphone's features.

1. Ensure Bluetooth is enabled on your smartphone.
2. On the car stereo, go to the CarPlay/Android Auto application.
3. Search for and select your car stereo's Bluetooth name on your phone.
4. Confirm the pairing code on both devices.
5. Once connected, CarPlay or Android Auto will launch automatically.

Image: The car stereo screen showing the main interface with options for Wireless CarPlay, Wireless Android Auto, and Mirror Link. Below, examples of CarPlay, Android Auto, and Mirror Link interfaces are displayed.

Mirror Link Function

Mirror Link allows you to display your smartphone's screen directly on the car stereo's display via a USB cable.

1. Connect your smartphone to the car stereo using an original USB cable.
2. Follow the on-screen prompts on both your phone and the car stereo to enable screen mirroring.

Bluetooth Connectivity

The integrated Bluetooth 5.1 module enables hands-free calling and wireless audio streaming.

1. Enable Bluetooth on your smartphone.
2. On the car stereo, navigate to the Bluetooth menu.
3. Search for available devices and select the car stereo's Bluetooth name.
4. Confirm the pairing. You can now make/receive calls and play music wirelessly.

Image: The top section shows the Bluetooth interface for pairing devices, making calls, and accessing music and address book. The bottom section displays the EQ System settings with a 10-band equalizer and preset sound modes like Jazz, Classic, Rock, Pop,

and User.

FM Radio

Access FM radio stations with clear reception and 18 preset memory slots.

- **Auto Scan:** The unit can automatically scan and save strong FM stations.
- **Manual Tuning:** Manually tune to desired frequencies.
- **Preset Stations:** Save your favorite stations to the 18 preset buttons for quick access.

Image: The top section illustrates the FM Radio interface, showing frequency display (87.50 MHz), signal strength, and preset station buttons (P1-P6). The bottom section shows the Steering Wheel Control (SWC) setup menu, allowing users to program various functions to their vehicle's steering wheel buttons.

Steering Wheel Controls (SWC)

If your vehicle supports steering wheel controls, you can configure them to operate the car stereo for convenience and safety.

1. Access the 'Steering Wheel Controls' settings menu.
2. Follow the on-screen instructions to map your steering wheel buttons to specific functions (e.g., volume up/down,

next/previous track, mode).

Reversing Camera Function

The included reversing camera provides a clear view of the area behind your vehicle, enhancing safety during parking and reversing maneuvers.

- When the vehicle is shifted into reverse gear, the car stereo will automatically display the camera feed on the screen.
- The display includes parking guidelines to assist with precise maneuvering.

Image: The top section shows the reversing camera view on the car stereo screen, complete with parking guidelines and a clear image of the rear environment. The bottom section illustrates the 7-color light support, allowing users to customize the button illumination colors.

EQ System

Adjust the audio output to your preference using the built-in 10-band equalizer and various preset sound effects (Jazz, Classic, Rock, Pop, User).

UI Customization

Personalize your car stereo's appearance:

- **Backlight Settings:** Choose from 7 different button illumination colors or set them to cycle automatically.
- **Wallpapers:** Select from various themed UI wallpapers.

MAINTENANCE

- **Screen Cleaning:** Use a soft, lint-free cloth to gently wipe the touchscreen. Avoid abrasive cleaners or solvents.
- **General Care:** Keep the unit free from dust and moisture. Do not expose it to extreme temperatures.
- **Software Updates:** Check the official Hodozzy website for any available software updates to ensure optimal performance and new features.

TROUBLESHOOTING

Problem	Possible Cause	Solution
No power	Incorrect power wiring; Blown fuse; Vehicle battery low.	Check power cable connections (yellow, red, black). Inspect vehicle fuses. Ensure vehicle battery is charged.
No sound	Speaker wires disconnected; Volume too low; Mute function active.	Verify speaker wire connections. Increase volume. Check if the unit is muted.
Bluetooth not connecting	Bluetooth not enabled on phone/stereo; Incorrect pairing process.	Ensure Bluetooth is active on both devices. Restart Bluetooth on both devices. Re-attempt pairing.
CarPlay/Android Auto not launching	Incorrect Bluetooth connection; Phone software issue; USB cable issue for Mirror Link.	Ensure stable Bluetooth connection for wireless. For Mirror Link, use an original USB cable. Restart phone and stereo.
Reversing camera not displaying	Camera wiring incorrect; Camera power issue; Reverse trigger wire not connected.	Check camera video input and power connections. Ensure the reverse trigger wire is correctly connected to the vehicle's reverse light.
Unit freezes or is unresponsive	Temporary software glitch.	Press the reset button (usually a small hole requiring a pin) or disconnect power for a few minutes and reconnect.
