ASPECTEK HR23

ASPECTEK Sticky Dome Flea Trap (Model HR23) - User Manual

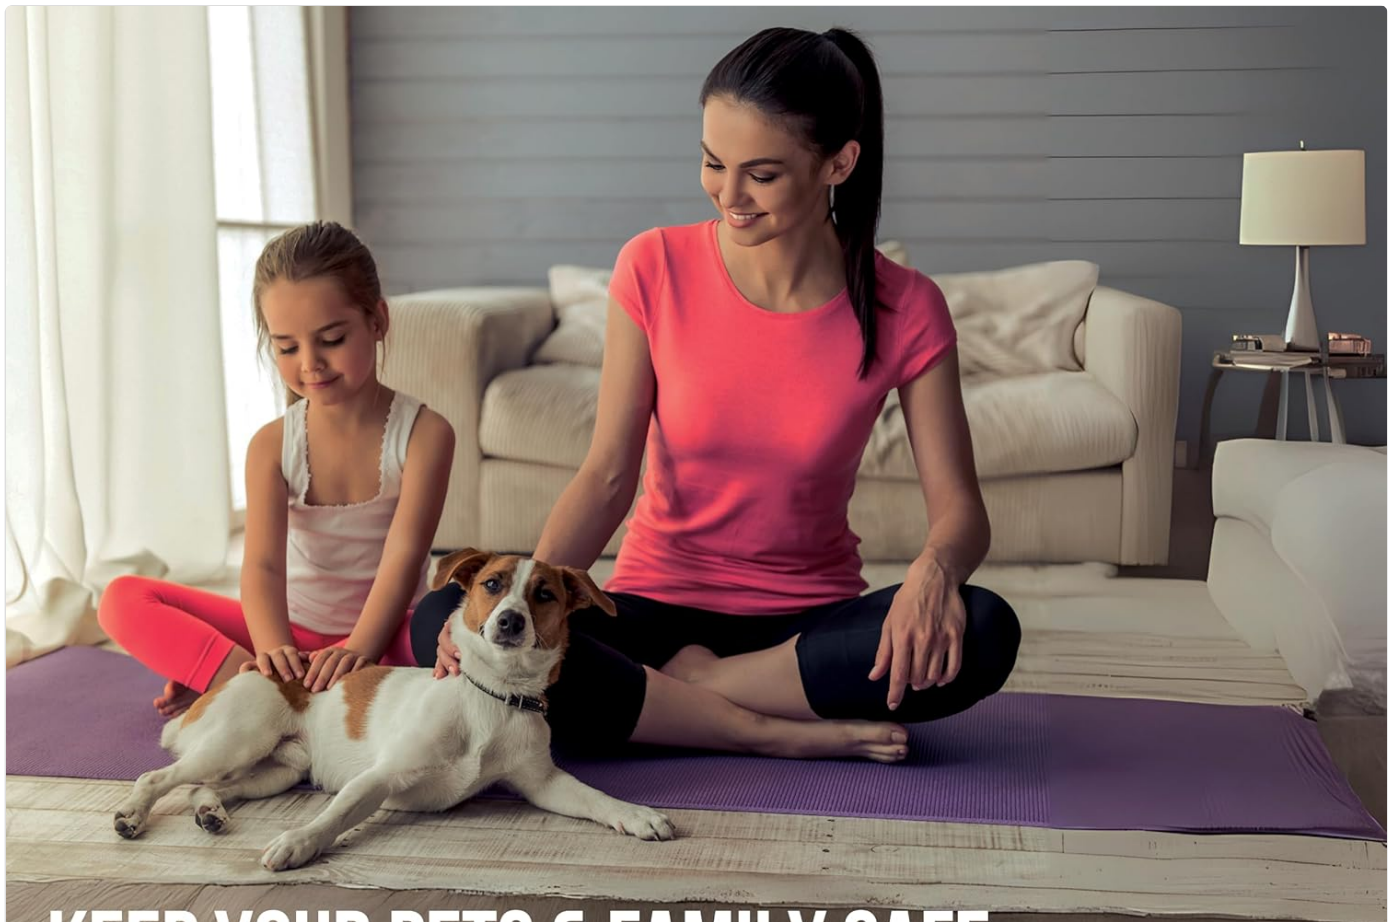

Effective Indoor Pest Control Solution

INTRODUCTION

The ASPECTEK Sticky Dome Flea Trap (Model HR23) is an odorless, non-toxic indoor insect trap designed to effectively capture fleas, bed bugs, and other small insects. It utilizes a combination of light, heat, and a sweet odor to attract pests to a replaceable sticky disc, providing a chemical-free solution for a pest-free environment. This manual provides detailed instructions for the safe and efficient use of your flea trap.

SAFETY INFORMATION

- This device is for indoor use only.
- Keep out of reach of children and pets to prevent accidental contact with the sticky disc or electrical components.
- Do not immerse the device in water or any other liquid.
- Unplug the device before cleaning or replacing components.
- Do not use if the power cord or plug is damaged.
- The light bulb generates heat; avoid touching it directly when the device is in operation or immediately after unplugging.

KEEP YOUR PETS & FAMILY SAFE

- ✓ Family-friendly design
- ✓ Odorless protection
- ✓ Safe to use around kids & pets
- ✓ No sprays or fumes

PACKAGE CONTENTS

Your ASPECTEK Sticky Dome Flea Trap package includes:

- 2 x Flea Trap Domes (Orange and Dark Gray)
- 4 x Sticky Glue Discs
- 4 x Light Bulbs

SETUP INSTRUCTIONS

Follow these steps to set up your ASPECTEK Sticky Dome Flea Trap:

1. **Unpack Components:** Carefully remove all components from the packaging.
2. **Insert Light Bulb:** Locate the light bulb socket inside the dome. Gently screw one of the provided light bulbs into the socket until it is secure. Do not overtighten.

3. **Prepare Sticky Disc:** Peel off the protective film from both sides of a sticky glue disc.
4. **Place Sticky Disc:** Place the prepared sticky disc onto the base of the trap, ensuring it lies flat and covers the entire base area.
5. **Assemble Dome:** Align the dome cover with the base and gently press down until it clicks into place.
6. **Plug In:** Plug the power cord into a standard household electrical outlet. The light bulb should illuminate.

OPERATING INSTRUCTIONS

The ASPECTEK Sticky Dome Flea Trap operates by attracting fleas and other insects using a combination of factors:

- **Light Attraction:** The warm light emitted by the bulb mimics a heat source, drawing insects towards the trap.
- **Heat Emission:** The heat generated by the bulb further enhances the attraction, as fleas are drawn to warmth.
- **Sweet Odor:** The sticky disc may contain a subtle sweet odor to further lure pests.

Once attracted, insects jump or crawl onto the super grabber sticky disc and become permanently trapped.

Placement Recommendations

- Place the trap in areas where flea activity is observed, such as near pet bedding, carpets, or furniture.
- The trap is effective up to 50 feet in all directions. For larger areas or multiple problem spots, use multiple traps.
- Ensure the trap is placed on a flat, stable surface.
- For optimal results, operate the trap continuously, especially during peak flea seasons.

TRIPLE ACTION HEAT, LIGHT & GLUE PADS FOR POWERFUL PEST CONTROL

Combines thermal output, visible light spectrum, and adhesive surface for efficient flea trapping.

Heat emission and light wavelength are designed to draw fleas and other small insects toward the trap.

Insects that make contact are immobilized on replaceable sticky pads, enabling consistent monitoring and control.

MAINTENANCE

Regular maintenance ensures the continued effectiveness of your flea trap.

Replacing Sticky Discs

Replace the sticky disc when it is full of insects or after approximately 2 weeks, whichever comes first. Refill sticky discs are available for purchase.

1. **Unplug the Trap:** Always unplug the device from the power outlet before handling.
2. **Remove Dome:** Carefully lift the dome cover from the base.
3. **Remove Used Disc:** Gently peel off the used sticky disc from the base and dispose of it in a sealed bag.
4. **Insert New Disc:** Follow steps 3 and 4 from the [Setup Instructions](#) to install a new sticky disc.
5. **Reassemble and Plug In:** Reassemble the dome and plug the trap back into the outlet.

Cleaning

Wipe the exterior of the trap with a dry or slightly damp cloth as needed. Do not use abrasive cleaners or immerse the unit in water.

TROUBLESHOOTING

Problem	Possible Cause	Solution
Trap light does not turn on.	Bulb is loose or burnt out.	Ensure the bulb is screwed in tightly. If it still doesn't light, replace the bulb with a new one.
Trap is not catching fleas.	Incorrect placement or low flea activity.	Relocate the trap to an area with higher suspected flea activity. Ensure the sticky disc is fresh. Consider using multiple traps.

Problem	Possible Cause	Solution
Sticky disc is not effective.	Disc is old, dirty, or protective film not fully removed.	Ensure both sides of the protective film are removed. Replace the sticky disc with a new one.
