3. MAINTENANCE

3.1 Cleaning the Nozzles

- To clean the nozzles, gently pull them out manually.
- Use a soft brush and mild soap to clean the nozzle tips.
- Rinse thoroughly with water and push them back into their retracted position.

3.2 General Cleaning

- Wipe the exterior of the bidet attachment with a soft, damp cloth and a mild, non-abrasive cleaner.
- Avoid using harsh chemicals or abrasive cleaning tools, as these can damage the finish.

3.3 Winterization

As a non-electric bidet, the SlimEdge does not require complex winterization procedures. However, if the bidet is installed in an unheated area where temperatures may drop below freezing, it is recommended to:

- Shut off the water supply to the bidet.
- Disconnect the bidet hose and drain any remaining water from the bidet and hose to prevent freezing and potential damage.

4. TROUBLESHOOTING
