## 5. Maintenance

Regular maintenance will help preserve the appearance and functionality of your cabinet.

- **Cleaning the Cabinet:** The cabinet features a waterproof surface for easy cleaning. Wipe surfaces with a soft, damp cloth. Avoid abrasive cleaners or harsh chemicals that could damage the finish.
- **Cleaning Mirrors:** Use a standard glass cleaner and a soft, lint-free cloth to clean the mirror surfaces. Spray cleaner onto the cloth, not directly onto the mirror, to prevent liquid from seeping into edges.
- **Hardware Check:** Periodically check all screws and fasteners to ensure they remain tight. Tighten if necessary to maintain stability.
- **Avoid Excessive Moisture:** While the surface is water-resistant, avoid prolonged exposure to excessive moisture to prevent damage to the engineered wood.

**Durable and Easy to Clean Features:**

## 6. Troubleshooting

If you encounter any issues with your cabinet, refer to the following common solutions:

- **Doors Not Aligning:** Check the hinge adjustments. Most hinges allow for minor adjustments to align doors horizontally, vertically, and for depth. Refer to the hinge manufacturer's instructions if specific adjustments are needed.
- **Cabinet Feels Unstable:** Ensure all wall mounting screws are securely tightened. Verify that the wall anchors are appropriate for your wall type and installed correctly. If possible, add additional mounting points for increased stability.
- **Shelf Wobbles:** Ensure the shelf pins are fully inserted into the pre-drilled holes and that the shelf rests evenly on all four pins.
- **Difficulty Closing Doors:** Check for any obstructions inside the cabinet. Ensure the magnetic catches are properly aligned and functioning.
