Igloo MaxCold 165 Quart Marine Cooler User Manual

Model: Igloo Maxcold 156L

PRODUCT OVERVIEW

The Igloo MaxCold 165 Quart Marine Cooler is designed for extended cooling performance, ideal for marine environments, camping, and large gatherings. Its robust construction and advanced insulation ensure contents remain cold for up to 7 days. Key features include reinforced handles, a large capacity, a built-in fish ruler on the lid, and an antimicrobial liner.

FEATURES

- **Reinforced Handles:** Good size reinforced handles on both sides for better grip and strength, facilitating easy transport.
- **Large Capacity:** Designed to hold up to 280 cans of drinks, providing ample space for events and gatherings.
- **Extended Ice Retention:** Constructed with reinforced plastic material for superior heat insulation, maintaining ice retention for up to 7 days.
- **Easy-to-Use Drain Plug:** Features a convenient plug drain for easy connection of hoses and efficient emptying of accumulated liquids.

- **Dual Top Access Gates:** Equipped with two reinforced top caps for practical, easy, and fast access to contents without fully opening the main compartment, minimizing temperature loss.
- **Integrated Fish Ruler:** A measuring system is built into the top lid, useful for measuring objects, particularly fish, when a tape measure is not readily available.
- **Removable Separators:** Includes two removable vertical separators, allowing for the creation of up to three separate compartments within the cooler for organized storage of different items.
- **Antimicrobial Liner:** Features a specialized lining system that inhibits the spread of microorganisms such as bacteria, viruses, or fungi, crucial for preventing the spread of harmful microbes and maintaining hygiene.

SETUP AND FIRST USE

1. **Unpacking:** Carefully remove the cooler from its packaging. Inspect for any shipping damage.
2. **Initial Cleaning:** Before first use, clean the interior and exterior of the cooler with mild soap and warm water. Rinse thoroughly and allow to air dry.
3. **Insert Separators (Optional):** If desired, insert the two vertical separators into the designated slots inside the cooler to create up to three distinct compartments.
4. **Pre-Chilling:** For optimal performance, pre-chill the cooler by placing a bag of ice or ice packs inside for several hours before loading contents.
5. **Loading Contents:** Place desired food and beverages inside. For best ice retention, fill the cooler as much as possible with ice, minimizing air space.
6. **Secure Lid:** Ensure the lid is securely latched to maintain internal temperature.

OPERATING INSTRUCTIONS

Maximizing Ice Retention

- **Pre-chill:** Always pre-chill your cooler before use.
- **Use Block Ice:** Block ice melts slower than cubed ice. A combination of both can be effective.
- **Minimize Opening:** Open the lid only when necessary and close it quickly to prevent cold air from escaping. Utilize the dual top access gates for quick retrieval of items.
- **Full Cooler:** A full cooler stays colder longer. Fill empty spaces with extra ice, towels, or crumpled newspaper.
- **Keep in Shade:** Position the cooler in a shaded area away from direct sunlight.
- **Elevate Cooler:** If possible, elevate the cooler off hot surfaces to reduce heat transfer.

Using the Drain Plug

The cooler is equipped with a threaded drain plug for easy water removal. To drain melted ice water, simply unscrew the cap from the drain plug. For continuous drainage, a standard garden hose can be attached to the threaded drain plug. Ensure the cap is securely tightened after draining to prevent leaks and maintain insulation.

MAINTENANCE AND CARE

- **Regular Cleaning:** After each use, clean the cooler thoroughly with mild soap and warm water. For stubborn stains or odors, a solution of baking soda and water can be used.
- **Rinse and Dry:** Always rinse the cooler completely to remove all soap residue and allow it to air dry with the lid open to prevent mold and mildew growth.
- **Antimicrobial Liner:** The antimicrobial liner helps prevent odors and stains. Regular cleaning will maintain its effectiveness.
- **Storage:** Store the cooler in a cool, dry place with the lid slightly ajar to allow for air circulation.
- **Avoid Harsh Chemicals:** Do not use abrasive cleaners, bleach, or harsh chemicals, as these can damage the cooler's finish and liner.
- **UV Protection:** The cooler is designed with ultraviolet inhibitors to prevent fading. However, prolonged exposure to direct sunlight can still affect its appearance over time.

TROUBLESHOOTING

Problem	Possible Cause	Solution
Poor Ice Retention	Cooler not pre-chilled.	Pre-chill cooler before use.
	Lid not securely latched.	Ensure latches are fully engaged.
	Too much empty space inside.	Fill cooler completely with ice or other items.
	Cooler exposed to direct sunlight/heat.	Move cooler to a shaded area or elevate it.
Water Leakage	Drain plug not tightened.	Tighten drain plug securely.
	Damaged drain plug gasket.	Inspect gasket for damage; replace if necessary.
Odor Inside Cooler	Improper cleaning or drying.	Clean thoroughly with baking soda solution and air dry.
	Strong-smelling contents.	Store with lid slightly ajar.
