SETUP & INSTALLATION

Installation of the Biorunn head unit is designed to be plug-and-play, retaining most original car functionalities. It is recommended to disconnect the car battery before starting the installation process.

1. Removing the Original Head Unit and Trim

Carefully remove the trim pieces surrounding your original head unit. It is crucial to remove them in the correct order to avoid damage, as some pieces overlap. Use the provided pry tool for this process. Take photos of the wiring connections before unplugging anything for future reference, especially if you plan to revert to the OEM unit.

2. Wiring Connections

Connect the provided harnesses to the new Biorunn head unit and then to your car's factory plugs. The harnesses are color-coded and designed to prevent incorrect connections. Ensure all necessary cables, including the GPS antenna, 4G antenna, and external microphone, are properly connected and routed.

3. Antenna and Microphone Routing

Route the GPS antenna, 4G antenna, and external microphone to optimal locations. The GPS antenna should have a clear view of the sky, the 4G antenna should be placed where it can receive a strong signal, and the microphone should be positioned for clear voice capture, typically near the driver's headliner or A-pillar.

4. Securing the New Head Unit

Attach the new metal mounting brackets to the Biorunn head unit using the provided screws. Carefully slide the new head unit into the dashboard opening, ensuring all connections are secure and wires are not pinched. Reinstall the trim pieces in reverse order of removal.

OPERATING INSTRUCTIONS

The Biorunn Android 13 head unit features an intuitive touchscreen interface similar to a tablet. Power on the unit by starting your vehicle. The Android logo will appear, followed by the main home screen.

1. Navigating the User Interface

Swipe left or right on the home screen to access different application pages. The main screen typically displays widgets for music, radio, and frequently used apps. Tap on icons to launch applications.

2. Radio Operation

Tap the 'Radio' icon to access the FM/AM tuner. You can manually tune frequencies by swiping across the frequency bar or use preset stations. The RDS feature provides station information where available.

3. Sound Settings and Equalizer

Access the 'Settings' menu, then navigate to 'Sound' to adjust audio preferences. The built-in equalizer (EQ) allows you to customize sound profiles (e.g., Jazz, Pop, Rock, Classical, News) or create a custom user profile. You can also adjust the sound zone and loudness settings.

4. Wireless CarPlay & Android Auto

The unit supports both Wireless/Wired CarPlay and Android Auto. Connect your smartphone via Bluetooth for wireless connection or use a USB cable for wired connection. Once connected, your phone's interface will be mirrored on the head unit, allowing access to navigation, calls, messages, and music.

MAINTENANCE

To ensure the longevity and optimal performance of your Biorunn Car Radio Stereo, follow these maintenance guidelines:

- Screen Cleaning:** Use a soft, lint-free cloth to gently wipe the touchscreen. Avoid abrasive cleaners or harsh chemicals that could damage the display.
- Software Updates:** Periodically check for system updates in the 'System' settings to ensure you have the latest features and bug fixes.
- Ventilation:** Ensure the unit's cooling fan and vents are not obstructed to prevent overheating.
- Cable Connections:** Regularly check all cable connections to ensure they are secure and free from damage.

TROUBLESHOOTING

If you encounter any issues with your Biorunn Car Radio Stereo, refer to the following troubleshooting tips:

- Unit Not Powering On:** Check the power cable connection and ensure the car battery is properly connected. Verify

the fuse for the head unit.

- **No Sound:** Check speaker connections, volume levels, and audio settings in the equalizer. Ensure the correct audio output mode is selected.
- **Touchscreen Unresponsive:** Try restarting the unit. If the issue persists, perform a factory reset (note: this will erase all custom settings and data).
- **Bluetooth/CarPlay/Android Auto Connection Issues:** Ensure Bluetooth is enabled on both the head unit and your smartphone. Forget the device on both ends and attempt to pair again. For wired connections, try a different USB cable.
- **Steering Wheel Controls Not Working:** Access the 'Steering Wheel' settings in the 'Original' menu and re-learn the controls.
- **Rearview Camera Not Displaying:** Check the camera's power and video connections. Ensure the 'Reverse' settings are correctly configured (e.g., reversing system selection).
- **Poor Wi-Fi/4G Signal:** Ensure antennas are properly installed and positioned for optimal reception. Avoid placing antennas near metal obstructions.
