WallarGe W-CL506

WallarGe Night Light Wall Clock (Model W-CL506) Instruction Manual

Your guide to setting up, operating, and maintaining your WallarGe wall clock.

PRODUCT OVERVIEW

The WallarGe Night Light Wall Clock, Model W-CL506, is a 12-inch silent wall clock designed for clear readability day and night. It features a smart light sensor that automatically illuminates the clock face in low light conditions, offering adjustable brightness levels. Its quartz movement ensures accurate timekeeping without a ticking sound.

SETUP INSTRUCTIONS

1. Battery Installation

The WallarGe Night Light Wall Clock requires a total of four (4) AA batteries (not included) for full functionality. One AA battery powers the clock movement, and three AA batteries power the smart light sensor.

1. Locate the battery compartments on the back of the clock.
2. Insert one (1) AA battery into the compartment designated for clock movement, ensuring correct polarity (+/-).
3. Insert three (3) AA batteries into the compartment designated for the smart light sensor, ensuring correct polarity (+/-).

2. Setting the Time

After installing the batteries, locate the time-setting knob on the back of the clock, usually near the clock movement battery compartment. Rotate this knob to set the correct time.

3. Mounting the Clock

The clock is designed for wall mounting. Use a suitable wall hook or screw (not included) to securely hang the clock in your desired location. Ensure the mounting point can support the weight of the clock (approximately 2.43 pounds).

OPERATING INSTRUCTIONS

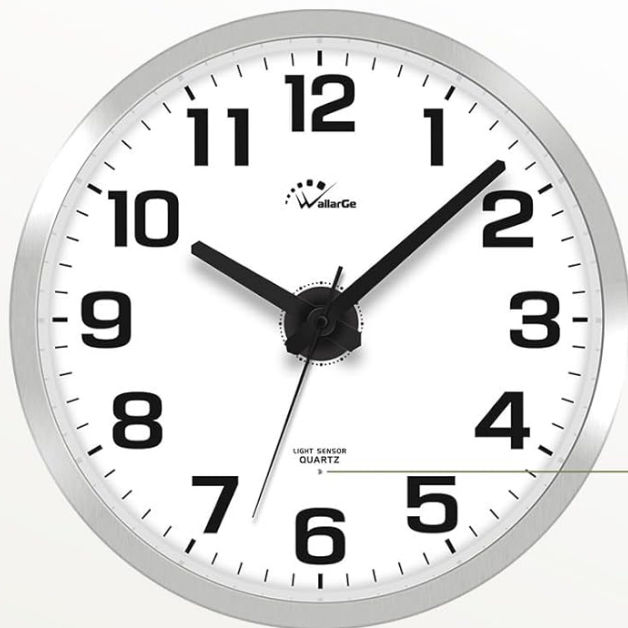

1. Smart Night Light Function

The clock features a smart light sensor that detects ambient light levels. When the surrounding environment becomes dark, the clock face will automatically illuminate. Conversely, the light will turn off when sufficient ambient light is detected.

- **Brightness Levels:** The night light offers two adjustable brightness levels: Low and High.
- **Turning Off the Light:** The night light function can be completely turned off using the switch located on the back of the clock.

2. Silent Operation

The clock is equipped with a precise quartz movement that ensures silent, non-ticking operation. This feature makes it suitable for bedrooms, offices, and other environments where quiet is preferred.

MAINTENANCE

- **Cleaning:** Wipe the clock face and frame with a soft, dry cloth. Avoid using abrasive cleaners or solvents.
- **Battery Replacement:** Replace all batteries (1xAA for movement, 3xAA for light) when the clock stops or the night light dims significantly. Always replace all batteries at the same time for optimal performance.
- **Environment:** Keep the clock away from extreme temperatures, direct sunlight, and high humidity to ensure longevity and accurate timekeeping.

TROUBLESHOOTING

- **Clock not running:**
 - Check if the AA battery for the clock movement is installed correctly with proper polarity.
 - Replace the clock movement battery with a fresh one.

- **Night light not working or dim:**

- Ensure the three AA batteries for the smart light are installed correctly with proper polarity.
- Replace the smart light batteries with fresh ones.
- Verify that the light sensor switch on the back of the clock is set to "Low" or "High", not "Off".
- Confirm that the ambient light is sufficiently dark for the sensor to activate.

- **Inaccurate time:**

- Replace the clock movement battery. A weak battery can affect accuracy.
- Ensure the clock is not exposed to strong magnetic fields.

SPECIFICATIONS

Brand	WallarGe
Model Number	W-CL506
Color	Silver
Display Type	Analog
Movement Type	Quartz
Special Features	Silent Clock, Smart Night Light (Adjustable Brightness)
Product Dimensions	12"W x 12"H
Item Weight	2.43 Pounds
Power Source	Battery Powered (1xAA for clock, 3xAA for light)
Material Type	Acrylonitrile Butadiene Styrene (ABS)
Mounting Type	Wall Mount
