## AOGITF S5

# AOGITF S5 Stainless Steel Pet Water Fountain

User Instruction Manual

## INTRODUCTION

The AOGITF S5 Stainless Steel Pet Water Fountain is designed to provide a continuous supply of fresh, filtered water for your pets. Constructed from durable 304 stainless steel, it offers a hygienic and long-lasting solution for pet hydration. The fountain features a quiet pump and a multi-layered filtration system to ensure clean drinking water, promoting your pet's health and encouraging increased water intake.

## PACKAGE CONTENTS

Please verify that all components are present before assembly:

- Stainless Steel Water Bowl
- Fountain Lid with Faucet Spout
- Water Pump
- Activated Carbon Filter
- Filter Sponge
- Power Adapter (USB cable with wall charger part)

## The Choice of 5,000,000 Pet Families

1. 2.2L/74oz Capacity
2. Easy to assemble
3. Stainless steel
4. Faucet design

### SETUP INSTRUCTIONS

---

1. **Clean Components:** Wash all parts (stainless steel bowl, lid, faucet, pump, filter housing) thoroughly with water and mild soap before first use. Rinse well.
2. **Assemble Filter:** Place the filter sponge around the pump base. Insert the activated carbon filter into its designated slot in the lid assembly.
3. **Install Pump:** Secure the water pump into the designated area on the underside of the fountain lid. Ensure the faucet spout is correctly attached to the pump outlet.
4. **Fill Water Bowl:** Place the stainless steel bowl on a flat, stable surface. Fill the bowl with clean water up to the maximum fill line (approximately 2.2 liters).
5. **Place Lid:** Carefully place the lid assembly onto the stainless steel bowl, ensuring the power cord is routed through the small notch in the base to prevent abrasion.
6. **Connect Power:** Plug the USB power cable into the wall adapter, then plug the adapter into a standard electrical outlet. The fountain will begin operating.

Image: The AOOGITF S5 Stainless Steel Pet Water Fountain fully assembled and operating, with water flowing from the faucet spout into the bowl.

## OPERATING INSTRUCTIONS

- **Continuous Operation:** The fountain is designed for continuous operation to provide fresh water 24/7.
- **Water Level:** Monitor the water level daily. The fountain has a 2.2-liter (74oz) capacity, which can last approximately one week for a single adult cat. Refill as needed to prevent the pump from running dry.
- **Refilling:** To refill, unplug the power cord, carefully lift the lid/pump assembly, and add fresh water to the bowl. Tilt the lid slightly to allow any trapped water to drain back into the base before fully removing it.

**74oz** **74oz/2.2L**  
**Capacity**

2200ml of drinking water > Drinking water for a 5KG adult cat for 7 days.

\* Adult cat water intake/day = weight/kg x 60ml

## MAINTENANCE

Regular cleaning and filter replacement are crucial for maintaining water quality and extending the life of your fountain.

- **Weekly Cleaning:** Disassemble all parts and wash them with water and mild soap. Rinse thoroughly. The stainless steel components are machine washable (dishwasher safe).

- **Filter Replacement:** Replace the activated carbon filter every 2-4 weeks, depending on the number of pets and water quality. Replace the filter sponge every 1-2 months or when visibly dirty.
- **Pump Cleaning:** Periodically clean the pump to remove any hair or debris that may affect its performance. Refer to the pump's specific instructions for detailed cleaning steps.

## TROUBLESHOOTING

- **Fountain is noisy:**
  - Check the water level. If the water level is too low, the pump may make noise. Refill the fountain.
  - Clean the pump. Debris or hair can obstruct the impeller, causing noise. Disassemble and clean the pump thoroughly.
- **Water flow is weak or stopped:**
  - Ensure the water level is sufficient.
  - Check for blockages in the pump or faucet spout. Clean any obstructions.
  - Replace the filter. A clogged filter can restrict water flow.

- Inspect the pump for damage. If the pump is faulty, it may need replacement.
- **Algae or slime buildup:**
  - Increase cleaning frequency. Weekly cleaning is recommended, especially in warmer climates.
  - Ensure the fountain is not exposed to direct sunlight, which can promote algae growth.

## SPECIFICATIONS

Feature	Detail
Model	S5
Material	304 Stainless Steel
Capacity	2.2 Liters (74 oz)
Dimensions (L x W x H)	7.48 x 6.3 x 4.33 inches
Item Weight	1.5 pounds
Pump Voltage	5V
Noise Level	Ultra-quiet (approx. 20-25 dB during normal operation)

## WARRANTY AND SUPPORT

The AOOGITF S5 Pet Water Fountain comes with a one-year warranty service. If you encounter any problems during use, please contact our customer support team for assistance.
