mlogiroa MLOUS-mini lamp

mlogiroa Mini UV Nail Lamp (Model: MLOUS-mini lamp) Instruction Manual

PRODUCT OVERVIEW

The mlogiroa Mini UV Nail Lamp is a compact and lightweight device designed for efficient curing of gel nail polishes and glues. Its pen-shaped design ensures portability, making it ideal for both home DIY manicures and on-the-go touch-ups. Featuring dual timer modes and a rechargeable battery, this lamp provides convenience and effective nail curing.

The mlogiroa Mini UV Nail Lamp in use, highlighting its compact design and UV light emission.

SETUP

Charging the Device

The mlogiroa Mini UV Nail Lamp features a Type-C charging port for convenient power replenishment. To charge, connect the provided USB Type-C cable to the lamp and a compatible power source, such as a computer, power bank, or mobile phone charger. The indicator light will display red while the device is charging and will turn blue once it is fully charged. A full charge provides approximately 40 minutes of continuous operation. The lamp can be used even while it is connected to a power source and charging.

Charging the Mini UV Nail Lamp: The indicator light shows red for low power and blue for a full charge.

OPERATING INSTRUCTIONS

Power On/Off and Timer Settings

The lamp offers two convenient timer settings for different curing needs:

- **Short Press:** Press the power button briefly for a 20-second curing cycle. This is ideal for flash curing or quick fixes.
- **Long Press:** Press and hold the power button for a 60-second curing cycle. Use this for more thorough curing of gel polishes and glues.

An integrated LCD screen displays the remaining time during operation, allowing for precise control over your curing process.

TWO-SPEED TIMING

20s

Short Press

60s

Long Press

The lamp features two-speed timing: 20 seconds for a short press and 60 seconds for a long press.

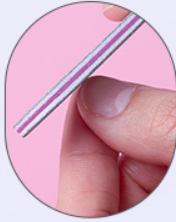

Application Steps for Gel Nails

Follow these steps for effective gel nail application and curing:

1. **Prepare Nails:** File and clean the nail surface thoroughly.
2. **Apply Gel Glue:** Apply gel glue to the inside of the nail tip.
3. **Secure Nail Tip:** Press the nail tip onto your natural nail and use the lamp to flash cure for 5 seconds to secure it in place.
4. **Full Cure Nail Tip:** Release the nail tip and cure for an additional 60 seconds to fully set the glue.
5. **Shape Nails:** Trim the nail tip to your desired length and shape.
6. **Base Coat:** Apply a base coat and cure for 60 seconds.
7. **Color Coat:** Apply your chosen nail polish and cure for 60 seconds. Repeat for additional coats if desired.
8. **Top Coat:** Apply a top coat and cure for 120 seconds for a durable, glossy finish.

HOW TO USE NAIL LAMPS ?

Note: ① Please do not put the brush in the light to avoid the brush solidifying and not being able to use;
② Please shine the light after finishing brushing to avoid affecting the gel effect.

File and clean the nail surface.

Apply glue to the inside of the nail tip

Press the nail tip to cure for 5s

Release the nail tip to cure for 60s

Trim nail tip

Apply base coat and cure for 60 s

Apply nail polish and cure 60 s

Apply top coat cure 120 s

Detailed steps for applying and curing gel nails using the mlogiroa Mini UV Nail Lamp.

Efficient Curing Technology

The lamp utilizes 365 + 405nm lamp beads combined with a convex lens to achieve a 5x amplified spotlight. This multi-angle illumination ensures that gel polishes and glues dry quickly and evenly, whether for short or long nails.

3W POWER

Wavelength

This video demonstrates the basic operation of the mlogiroa Handheld UV Light for Nails, including powering it on and off, and showcasing its light output.

MAINTENANCE

Cleaning

To maintain the device, gently wipe the exterior with a soft, dry cloth. Do not use abrasive cleaners, solvents, or immerse the lamp in water, as this may damage the internal components.

Storage

Store the Mini UV Nail Lamp in a cool, dry place away from direct sunlight, high temperatures, and excessive humidity. Ensure it is kept out of reach of children.

TROUBLESHOOTING

Lamp Not Turning On

- **Check Battery:** Ensure the device is fully charged. If the indicator light is red, the battery is low. Charge the device using the provided USB Type-C cable.

Gel Not Curing Effectively

- **Curing Time:** Verify that the correct curing time (20s or 60s) is selected for your specific gel product. Some gel colors, particularly white and black, may require longer exposure.
- **Light Placement:** Ensure the UV light is directly and evenly focused on the nail surface.

Battery Life Shorter Than Expected

- **Full Charge:** Always ensure the device is fully charged before use.
- **Usage Patterns:** Frequent or prolonged use may naturally reduce the perceived battery life.

PRODUCT SPECIFICATIONS

| Feature | Specification |
|------------------|--|
| Model | Handheld Light |
| Wavelength | 365 + 405nm |
| Size | 4.36 in x 0.67 in (approx. 110.8mm x 17mm) |
| Weight | 0.08 Kilograms (approx. 23g) |
| Battery Capacity | 180mAh |
| Input Power | DC5V / 0.5A |
| Power | 3W |
| Battery Life | 40 minutes (on a full charge) |
