Naroot Mini WiFi Camera User Manual

Model: Narootensg2qibu9z-11

1. INTRODUCTION

This manual provides detailed instructions for the setup, operation, and maintenance of your Naroot Mini WiFi Camera. Please read this manual thoroughly before using the device to ensure proper functionality and to avoid any operational issues. Keep this manual for future reference.

2. PRODUCT OVERVIEW

The Naroot Mini WiFi Camera is a compact and portable surveillance device designed for home or office security. It features 1080P HD video recording, WiFi connectivity for real-time monitoring, and a magnetic back cover for versatile placement.

Key Features:

- **1080P HD Lens:** Provides high-resolution image and video recording quality.
- **Magnetic Back Cover:** Allows easy attachment to any iron material surface.
- **WiFi Connection:** Enables real-time remote viewing via a mobile application.
- **Built-in Battery:** Integrated 240 mAh battery offers approximately 45 minutes of operation without external power.
- **Compact and Lightweight Design:** Facilitates discreet placement and portability.
- **Night Vision:** Supports recording in low-light conditions.

3. SETUP

3.1 Charging the Camera

Before initial use, fully charge the camera's built-in battery.

1. Connect the provided Micro USB charging cable to the camera's charging port.
2. Connect the other end of the cable to a 5V 1A USB power adapter (not included) or a computer USB port.
3. The charging indicator light will illuminate during charging and turn off once fully charged.

Note: A full charge typically takes approximately 30 minutes.

3.2 Memory Card Installation

To store recorded video footage, a storage card (MicroSD card) is required (not included).

1. Locate the memory card slot on the camera.
2. Gently insert a MicroSD card (up to 128GB capacity) into the slot until it clicks into place. Ensure the card is inserted in the correct orientation.
3. To remove, gently press the card inward until it springs out.

3.3 Mobile App Connection

The camera connects to your mobile device via WiFi for real-time monitoring and control.

1. Download the designated mobile application (refer to the included specification sheet for app name or QR code) from your device's app store (compatible with Android).
2. Power on the camera by pressing the 'ON/OFF' button.
3. Open the mobile application and follow the on-screen instructions to add a new device.
4. Connect your smartphone to the camera's WiFi hotspot (usually starts with a unique identifier).
5. Once connected, you can configure the camera to join your home or office WiFi network for remote access.

4. OPERATING INSTRUCTIONS

4.1 Power On/Off

- **Power On:** Press and hold the 'ON/OFF' button for a few seconds until the indicator light illuminates.
- **Power Off:** Press and hold the 'ON/OFF' button again for a few seconds until the indicator light turns off.

4.2 Recording Modes

The camera supports 1080P video recording. Specific recording modes (e.g., continuous, motion-activated) are typically configured through the mobile application.

- Use the 'MODE' button to switch between different operational modes if available (e.g., video recording, photo mode). Refer to the app for advanced settings.

4.3 WiFi Connection and Remote Viewing

Once connected to the mobile app and your WiFi network, you can:

- View live video feed from the camera on your smartphone.
- Access recorded footage stored on the MicroSD card.
- Receive alerts (e.g., motion detection) if configured in the app.

4.4 Night Vision

The camera is equipped with night vision capabilities, allowing it to capture clear images and videos even in low-light or dark environments. This feature typically activates automatically or can be controlled via the mobile application.

4.5 Magnetic Mounting

The camera features a built-in magnet for easy placement.

- Attach the camera directly to any ferrous metal surface.
- Use the included magnetic suction bracket for more flexible positioning on non-metallic surfaces.

5. MAINTENANCE

5.1 Cleaning

- Use a soft, dry cloth to clean the camera body.
- For the lens, use a specialized lens cleaning cloth to avoid scratches.
- Do not use liquid cleaners or solvents.

5.2 Battery Care

- Avoid exposing the camera to extreme temperatures.
- If storing the camera for an extended period, charge it to approximately 50% to prolong battery life.

6. TROUBLESHOOTING

- **Camera not turning on:** Ensure the battery is charged. Connect to a power source and try again.
- **Cannot connect to WiFi:** Verify that the camera is powered on and within range of your router.

Ensure correct WiFi password entry in the app. Restart both the camera and your router.

- **No video recording:** Check if a MicroSD card is properly inserted and has sufficient free space. Format the card if necessary (via the app).
- **Poor video quality:** Ensure the lens is clean. Check lighting conditions.
- **App not responding:** Close and reopen the app. Restart your smartphone.
