**domi outdoor living 10' x 12' Double Roof**

# Domi 10' x 12' Hardtop Gazebo Instruction Manual

Model: 10' x 12' Double Roof | Brand: domi outdoor living

## 1. INTRODUCTION

This manual provides essential information for the safe and efficient assembly, operation, and maintenance of your Domi 10' x 12' Hardtop Gazebo. Designed for outdoor living spaces, this gazebo features a durable galvanized steel double roof, privacy curtains, and insect netting, offering a comfortable and protected environment. Please read all instructions carefully before beginning assembly or use.

## 2. SAFETY GUIDELINES

- **Anchoring:** Always anchor the gazebo securely to the ground for maximum stability.
- **Extreme Weather:** In conditions of strong winds, heavy rain, or snow, secure the curtains and netting tightly. Clear any snow accumulation from the roof promptly to prevent structural damage and potential hazards.
- **Assembly:** Assembly requires multiple individuals. Do not attempt to assemble alone.
- **Tools:** Use appropriate tools and follow all safety precautions during assembly.

## 3. PACKAGE CONTENTS

Verify that all components listed in the packing list are present and undamaged before beginning assembly. The package typically includes:

- Galvanized Steel Double Roof Panels
- Aluminum Frame Components (posts, beams, supports)
- Privacy Curtains
- Insect Netting
- Assembly Hardware (screws, bolts, washers, etc.)
- Instruction Manual

## 4. SETUP AND ASSEMBLY

The Domi Hardtop Gazebo is designed for straightforward installation with detailed instructions and all necessary hardware included. Assembly typically requires 2-3 people. It is recommended to use power tools with appropriate bits for efficiency, especially for the numerous screws and bolts.

### Key Assembly Steps:

1. **Frame Assembly:** Begin by assembling the main frame structure, including the posts and beams. Ensure all connections are secure but do not fully tighten until the entire frame is aligned.
2. **Roof Structure:** Attach the roof support beams and framework. This step may require ladders and careful alignment.
3. **Roof Panel Installation:** Install the galvanized steel roof panels. Ensure they are properly seated and secured to prevent leaks.
4. **Curtains and Netting:** Install the curtains and netting onto the designated tracks. The dual-track system allows for independent operation of both.
5. **Anchoring:** Secure the gazebo to your patio, deck, or lawn using the pre-drilled fixing holes in the base plates. Use appropriate anchors for your surface (e.g., concrete stakes, lag bolts for wood).

## 5. OPERATING INSTRUCTIONS

### Curtains and Netting:

The gazebo features a dual-track system for its curtains and netting, allowing for flexible usage:

- **Privacy and Insect Protection:** The outer track holds the privacy curtains, while the inner track holds the polyester insect netting. Both can be zipped closed for full enclosure.
- **Open Configuration:** Use the included tie-backs to secure the curtains and netting to the gazebo posts when you desire an open-air environment.

### Double Roof Design:

The double-roof design promotes air circulation, creating a ventilation system that helps keep the gazebo cool and comfortable. The sloped roof also facilitates efficient rain and snow runoff.

### Ceiling Hooks:

Three integrated ceiling hooks are provided for hanging fans, lights, or decorative items, enhancing your outdoor living experience.

## 6. CARE AND MAINTENANCE

- **Cleaning:** The durable materials (aluminum and galvanized steel) are resistant to fading, rust, and corrosion. Clean the frame and roof panels with a mild soap and water solution. Wipe curtains and netting with warm water as needed.
- **Seasonal Care:** While designed to withstand harsh weather, regular inspection and maintenance will prolong the life of your gazebo. Ensure all fasteners are tight and components are in good condition.
- **Snow Removal:** During winter, regularly remove snow from the roof to prevent excessive weight accumulation.

## 7. TROUBLESHOOTING

If you encounter any issues with your gazebo, please refer to the following common solutions:

- **Wobbly Structure:** Ensure all bolts and screws are tightened. Verify that the gazebo is properly anchored to the ground.
- **Leaking Roof:** Check that all roof panels are correctly installed and overlapping as per the assembly instructions. Ensure all seals are intact.
- **Curtains/Netting Not Sliding Smoothly:** Inspect the tracks for any obstructions or debris. Ensure the curtain/netting hooks are properly seated in the tracks.

For further assistance, please contact customer support.
