Mojgar 25L Electric Humidor Model 4456601 User Manual

Brand: Mojgar

INTRODUCTION

This manual provides essential information for the safe and efficient operation of your Mojgar 25L Electric Humidor. Please read all instructions carefully before use to ensure optimal performance and longevity of your unit.

SAFETY INFORMATION

- Ensure the humidor is placed on a stable, level surface.
- Do not block ventilation openings on the unit.
- Keep the humidor away from direct sunlight and heat sources.
- Do not use abrasive cleaners or sharp objects inside the unit.
- Unplug the unit before cleaning or performing any maintenance.
- This product is designed for indoor use only.

PRODUCT FEATURES

The Mojgar 25L Electric Humidor is designed to maintain an optimal environment for cigar preservation. Key features include:

- **Temperature Control:** Utilizes semiconductor cooling technology to maintain a stable internal temperature range of 61-72°F. Note: This unit provides cooling only and does not warm up.
- **Spanish Cedar Wood Shelves:** Constructed from high-quality Spanish cedar, which naturally emits an aroma to moisturize cigars, prevent odors, and deter mold.
- **Enhanced Air Circulation:** Features cut-outs in drawer fronts and shelves to promote better air circulation, ensuring consistent conditions throughout the humidor.
- **Excellent Sealing:** The door is equipped with thickened sealing strips to effectively isolate external heat.
- **UV Protection:** Double-layer mirror glass protects cigars from harmful UV rays.
- **Flexible Storage:** Innovative design allows for more efficient use of internal space, including an improved bottom storage area.

- **Built-in Hygrometer:** An integrated hygrometer allows for easy monitoring of internal humidity levels.

Video 3: Review of the Mojgar 25L Electric Humidor, demonstrating its features and user experience. This video provides a practical demonstration of the humidor's operation and internal components.

SETUP INSTRUCTIONS

1. **Unpacking:** Carefully remove the humidor from its packaging. Inspect for any damage.
2. **Placement:** Place the humidor on a flat, stable surface away from direct sunlight, heat sources, and areas with high

humidity. Ensure adequate ventilation around the unit.

3. **Initial Power-Up:** Plug the humidor into a grounded electrical outlet. Allow the unit to stabilize for at least 24 hours before placing cigars inside.
4. **Seasoning the Cedar:** To prepare the Spanish cedar shelves and drawers, lightly wipe them with a clean cloth dampened with distilled water. Do not soak the wood.
5. **Humidification:** Fill the included humidification box with distilled water. Place it inside the humidor.
6. **Initial Humidity Stabilization:** Close the humidor door and allow the internal humidity to stabilize for 3-5 days. Monitor the built-in hygrometer.

OPERATING INSTRUCTIONS

Your Mojgar Electric Humidor features a touch control panel for easy operation.

Temperature Adjustment

1. The digital display shows the current internal temperature.
2. Use the "Up" and "Down" arrows on the control panel to set your desired temperature between 61°F and 72°F.
3. The unit will automatically adjust to maintain the set temperature.

Internal Lighting

Press the light bulb icon on the control panel to turn the internal LED light on or off. The light will automatically turn off after 10 minutes to conserve energy and prevent heat buildup.

Humidity Management

The humidor's humidity cannot be directly adjusted by the unit. To increase humidity, ensure the humidification box is filled with distilled water. For precise humidity control, consider using humidity control packs (e.g., Boveda packs) in conjunction with the humidification box.

MAINTENANCE

Cleaning

- Unplug the humidor before cleaning.
- Wipe the exterior with a soft, damp cloth.
- Clean the interior with a clean, dry cloth. Avoid using harsh chemicals or abrasive materials.
- Regularly check and refill the humidification box with distilled water as needed.

Seasoning Maintenance

Re-seasoning the cedar shelves and drawers is recommended approximately once a year, or if the humidor has been left dry for an extended period. Follow the initial seasoning steps outlined in the Setup section.

TROUBLESHOOTING

Temperature Issues

- **Temperature too high/low:** Ensure the humidor is not placed in direct sunlight or near heat sources. Verify that the ambient room temperature is within the recommended range (50-90°F). Ensure proper ventilation around the unit, keeping it at least 0.4 inches away from walls.
- **Temperature not adjusting:** Unplug the unit for a few minutes, then plug it back in. If the issue persists, contact

customer support.

Humidity Issues

- **Humidity too low:** Ensure the humidification box is filled with distilled water. Consider adding more humidification sources like humidity control packs.
- **Hygrometer shows different reading:** Analog hygrometers can vary. For precise readings, use a calibrated digital hygrometer inside the unit. If you suspect the built-in hygrometer is faulty, power off the machine for a period and recheck after powering on.

SPECIFICATIONS

- **Brand Name:** Mojgar
- **Model Number:** 4456601
- **Item Weight:** 24.6 pounds
- **Product Dimensions:** 19.5 x 9.8 x 17.6 inches
- **Capacity:** 25 Liters
- **Installation Type:** Freestanding
- **Special Features:** Semiconductor Cooling
- **Door Material Type:** Glass
- **Shelf Type:** Wood Shelves
