SETUP GUIDE

1. Download the App

Search for and download the "**Smart Life**" or "**Tuya Smart**" application from your mobile device's app store (available on iOS and Android).

2. Connect to Wi-Fi

Ensure your home Wi-Fi network is operating on the **2.4 GHz frequency band**. The smart plug does not support 5 GHz Wi-Fi networks. Make sure your mobile device is connected to the 2.4 GHz Wi-Fi network during the setup process.

Image: Wi-Fi Compatibility. This diagram illustrates that the smart plug requires a 2.4 GHz Wi-Fi network and is not compatible with 5 GHz networks. No additional hub is required for connection.

3. Pairing the Smart Plug

1. Plug the ANTELA Smart Plug into a standard wall socket.
2. Open the Smart Life or Tuya Smart app and register/log in.
3. Press and hold the LED switch button on the smart plug for 5 to 10 seconds until the LED light begins to flash rapidly. This indicates it is in pairing mode.
4. In the app, tap the "+" icon to add a new device. Select "Electrical Outlet" or "Smart Plug" from the device list.
5. Follow the on-screen instructions in the app to connect the smart plug to your 2.4 GHz Wi-Fi network.
6. Once successfully paired, the LED indicator will stop flashing and remain solid. You can now rename your smart plug for easier identification.

MAINTENANCE

To ensure the longevity and proper functioning of your ANTELA Smart Plug, follow these maintenance guidelines:

- **Cleaning:** Gently wipe the surface of the smart plug with a dry, soft cloth. Do not use liquid cleaners or abrasive materials.
- **Environment:** Keep the smart plug in a dry environment and avoid exposure to direct sunlight, extreme temperatures, or corrosive substances.
- **Storage:** If not in use for an extended period, unplug the device and store it in a cool, dry place.

TROUBLESHOOTING

If you encounter issues with your ANTELA Smart Plug, refer to the following troubleshooting steps:

Plug not connecting to Wi-Fi

- **Check Wi-Fi Band:** Ensure your router is broadcasting a 2.4 GHz Wi-Fi signal and your phone is connected to it during setup. The plug does not support 5 GHz Wi-Fi.
- **Signal Strength:** Make sure the smart plug is within range of your Wi-Fi router.
- **Reset Plug:** Press and hold the button on the plug for 5-10 seconds until the LED flashes rapidly, then try pairing again.
- **Restart Router:** Power cycle your Wi-Fi router and try connecting again.

App not responding or device offline

- **Check Internet Connection:** Verify that your smartphone has an active internet connection.
- **Restart App:** Close and reopen the Smart Life or Tuya Smart app.

- **Update App:** Ensure your app is updated to the latest version.
- **Check Plug Status:** Physically check if the smart plug is powered on and its LED indicator is solid.

Voice control issues

- **Account Linking:** Confirm that your Smart Life/Tuya Smart account is correctly linked to your Alexa or Google Assistant app.
- **Device Discovery:** Ask your voice assistant to discover new devices.
- **Correct Commands:** Use the exact device names you set in the app when giving voice commands.
- **Internet Connection:** Ensure both your voice assistant device and smart plug have stable internet connections.
