

Baseus PPAP10

Baseus Portable Charger User Manual

Model: PPAP10

1. INTRODUCTION

Thank you for choosing the Baseus Portable Charger. This 10000mAh slim battery pack is designed to provide fast and efficient charging for your mobile devices on the go. Featuring 20W Power Delivery (PD) and Quick Charge (QC) capabilities, it ensures your devices are powered quickly and safely. This manual provides essential information on product features, setup, operation, maintenance, and troubleshooting.

2. SAFETY INFORMATION

Please read all safety warnings and instructions before using this product to ensure safe operation and prevent damage. Keep this manual for future reference.

- Do not expose the power bank to extreme temperatures (above 60°C/140°F) or direct sunlight.
- Avoid dropping, disassembling, or attempting to repair the device yourself.
- Keep away from water, moisture, and flammable materials.
- Do not use if the power bank is damaged, swollen, or leaking.
- Use only certified charging cables and adapters.
- Keep out of reach of children.
- Dispose of the product responsibly according to local regulations.

8 Safety Protections

4. PRODUCT OVERVIEW

The Baseus Portable Charger features a compact design with multiple ports for versatile charging.

4.1. Physical Features

- **LED Indicator Lights:** Four blue LED lights indicate the remaining battery capacity. Each light represents approximately 25% charge.
- **Power Button:** Activates the power bank and checks battery level.

Image: Close-up view of the power bank's LED indicator lights and the orange power button.

4.2. Ports

- **USB-C Port:** Supports 20W Power Delivery output and 18W input for fast recharging.
- **USB-A Port:** Supports 18W output for charging devices.
- **Micro USB Port:** Supports 18W input for recharging the power bank.

5. SETUP

5.1. Initial Charging of the Power Bank

Before first use, fully charge your Baseus Portable Charger.

1. Connect the included USB-A to USB-C cable to the USB-C input port of the power bank.
2. Connect the other end of the cable to a compatible 18W (or higher) wall charger (not included).
3. The LED indicator lights will illuminate to show charging progress. All four lights will be solid when fully charged.

A full charge takes approximately 2 hours and 48 minutes with an 18W charger.

PD 18W Fast Recharging

2.8Hrs

Fully recharged

⚡ 100%

Note: PD 18W fast recharging requires using a 18W wall charger (not included) or higher.

Image: The Baseus Portable Charger connected to a wall adapter for recharging, with an indication that it fully recharges in 2.8 hours.

6. OPERATING INSTRUCTIONS

6.1. Charging Your Devices

The power bank supports fast charging for a wide range of devices.

1. Connect your device's charging cable to either the USB-C output port or the USB-A output port on the power bank.

2. Connect the other end of the cable to your device.
3. The power bank will automatically begin charging your device.
4. To check the power bank's remaining battery, press the power button once.

The 20W PD USB-C output can charge an iPhone 15 up to 50% in approximately 30 minutes.

30% Faster Charging

PD 20W

The image shows a black Baseus portable charger with a white USB-C cable connected to an iPhone 15 Pro. The phone's screen displays a battery level of 80% and a charging icon. The charger has a white USB-A cable connected to its side. Below the phone, a comparison graphic shows two battery icons: a green one labeled '50%' and 'PD 20W' on the left, and a grey one labeled '38%' and '15W' on the right, with 'VS' in the center.

7. MAINTENANCE

- Clean the power bank with a soft, dry cloth. Do not use harsh chemicals or abrasive materials.
- Store in a cool, dry place away from direct sunlight and extreme temperatures.
- If not used for extended periods, charge the power bank at least once every three months to maintain battery health.
- Avoid physical shocks or impacts to the device.

8. TROUBLESHOOTING

Problem	Possible Cause	Solution
Power bank not charging.	Cable or adapter issue; power bank fully charged; faulty port.	Try a different cable or wall adapter. Ensure the power bank is not already full. Try a different input port if available.
Device not charging from power bank.	Power bank is empty; cable issue; device incompatibility; power bank in standby.	Recharge the power bank. Try a different charging cable. Ensure your device supports charging from a power bank. Press the power button to activate output.
Slow charging.	Non-fast charging cable/adapter; device not supporting fast charge; multiple devices charging.	Use a fast-charging compatible cable and adapter. Ensure your device supports PD/QC. Charging multiple devices simultaneously may reduce individual charging speeds.
LED indicators not working.	Power bank is off; internal malfunction.	Press the power button. If still unresponsive, contact customer support.

9. SPECIFICATIONS

Feature	Detail
Model Number	PPAP10
Battery Capacity	10000 Milliamp Hours
Product Dimensions	6 x 0.7 x 2.7 inches
Item Weight	11.4 ounces
