Spigen ITT90-3

Spigen OneTap 3 (MagFit) Car Mount Instruction Manual

Model: ITT90-3

1. PRODUCT OVERVIEW

The Spigen OneTap 3 (MagFit) is a magnetic car mount designed for secure phone placement in Tesla vehicles. It features OneTap Technology for easy attachment and a robust magnetic hold.

Compatibility

This car mount is compatible with:

- Tesla Model 3, Model Y, Model S (2021+), and Model X (2021+).
- iPhone 16, 15, 14, 13, and 12 series.
- MagSafe compatible cases are required for optimal magnetic attachment.

Check for compatibility.

Compatible with 2021+ Model S and X, all Model 3 and Ys, and iPhone 12 or newer.

All Model 3 | Y

2021 Model S | X

iPhone 14 | 13 | 12 Series

**Only works with Magsafe compatible case.*

2. INSTALLATION GUIDE

Follow these steps for a secure and lasting installation of your Spigen OneTap 3 car mount.

Preparation:

1. Identify the desired mounting location behind the corner of your Tesla's display screen.
2. Clean the surface thoroughly with isopropyl alcohol and ensure it is completely dry before proceeding. This removes any dust or oils that could compromise adhesion.
3. Ensure the car interior is not excessively hot during installation to allow for proper adhesive curing.

Mounting Steps:

1. Remove the protective film from the pre-applied adhesive on the back of the mount.
2. Carefully position the mount behind the corner of your Tesla's screen.
3. Press firmly on the mount for at least 30 seconds to ensure strong initial adhesion.
4. **Important:** Allow a curing time of at least 8 hours for optimal adhesion. For full strength, wait 24 hours before attaching your phone or adjusting the mount.

**Adjustable
viewing angle.**

Angle and adjust the arm to
a view that best suits you for
easy hands-free viewing.

Figure 3: Visual guide for secure installation, showing adhesive placement and recommended curing times.

For secure installation.

One pre-applied adhesive and one extra for later.

FOR FULL STRENGTH

Wait at least **24 hours** for the adhesive to harden on the surface.

Figure 4: Step-by-step installation process for the Spigen OneTap 3 car mount.

An extra adhesive pad is included for future re-installation if needed.

3. OPERATING INSTRUCTIONS

Attaching Your Phone:

The Spigen OneTap 3 utilizes MagFit technology for a strong magnetic connection with your iPhone (12 series or newer) or MagSafe compatible case.

1. Ensure your iPhone or case is MagSafe compatible.
2. Simply bring your iPhone close to the magnetic head of the mount. It will snap securely into place.

Easy and secure installation.

The pre-applied adhesive makes it easy to mount it onto your Tesla's display.

- 1 Attach it behind the corner of your screen.

- 2 Adjust the mount, then push it to lock.

- 3 Snap on your phone and enjoy the view.

Figure 5: Magnetic attachment of an iPhone to the OneTap 3 mount.

Adjusting the Viewing Angle:

The mount features an adjustable swing arm and swivel head for optimized viewing angles.

- **Swing Arm:** Press the button on the side of the arm to adjust its position. It locks into 0-degree, 45-degree, and 90-degree angles, allowing for both horizontal and vertical phone orientation.
- **Swivel Head:** The magnetic head can be rotated 360 degrees to fine-tune your phone's orientation.

Strong OneTap mount.

OneTap Technology mounts and secures your iPhone on the drive with MagSafe.

MAGFIT

Magnetic ring mounts your iPhone with a quick snap.

5. CARE AND MAINTENANCE

To ensure the longevity and optimal performance of your Spigen OneTap 3 car mount:

- Clean the mount periodically with a soft, damp cloth. Avoid harsh chemicals or abrasive cleaners.
- Ensure the adhesive area remains clean and free from debris. If re-installation is necessary, use the provided extra adhesive pad.
- Avoid exposing the mount to extreme temperatures for prolonged periods, as this may affect the adhesive.

6. TROUBLESHOOTING

If you encounter issues with your Spigen OneTap 3 car mount, consider the following:

- **Mount not adhering properly:** Ensure the installation surface was clean and dry, and that sufficient curing time (at least 8 hours, ideally 24 hours) was allowed after initial application. Re-apply with the extra adhesive pad if necessary.
- **Phone not holding magnetically:** Verify that your iPhone is a 12 series or newer, or that your phone case is MagSafe compatible. Ensure no foreign objects are between the phone/case and the mount's magnetic surface.
- **Arm not adjusting smoothly:** Check for any obstructions in the hinge mechanism. If the issue persists, contact customer support.
