G3 Ferrari G50052 Cool Master

G3 Ferrari G50052 Cool Master Bladeless Air Cooler Instruction Manual

Model: G50052 Cool Master

1. IMPORTANT SAFETY INFORMATION

Please read this manual carefully before using the G3 Ferrari G50052 Cool Master Bladeless Air Cooler. Keep these instructions for future reference. Failure to follow these instructions may result in electric shock, fire, or serious injury.

- Always ensure the power supply matches the voltage specified on the rating label.
- Do not immerse the appliance, cord, or plug in water or other liquids.
- Unplug from the outlet when not in use, before assembling or disassembling parts, and before cleaning.
- Do not operate any appliance with a damaged cord or plug, or after the appliance malfunctions or has been damaged in any manner.
- Keep the appliance out of reach of children.
- Do not block air inlets or outlets.
- Use only on a flat, stable surface.
- Do not use outdoors.

2. PRODUCT OVERVIEW

The G3 Ferrari G50052 Cool Master is a bladeless evaporative air cooler designed to ventilate, cool, and humidify your environment. It also features an ion function for air purification.

Image 1: Front view of the G3 Ferrari G50052 Cool Master Bladeless Air Cooler. This image shows the tall, sleek white tower design with a circular display in the middle and the water level indicator at the bottom.

Key Features:

- 35W DC Motor: Low power consumption with strong airflow.
- Bladeless Operation: Enhanced safety and sleek design.
- Electronic Control and Remote Control: Convenient operation.
- 12 Operating Speeds: Customizable airflow intensity.
- 12-Hour Timer: Schedule operation for convenience.
- Automatic Horizontal Oscillation: Wide area coverage.
- 2-Liter Water Tank Capacity: For cooling and humidifying functions.
- Ion Function: For air purification.
- Cooler and Humidifier Function: Dual functionality for comfort.
- Courtesy Light: Ambient lighting feature.

3. SETUP AND ASSEMBLY

Before first use, ensure all components are present and assemble the unit as described below.

Package Contents:

- Air Cooler Unit
- Base Support
- Remote Control
- 2 Ice Boxes
- Instruction Manual
- Warranty Card

Assembly Steps:

1. **Unpack:** Carefully remove all components from the packaging.
2. **Attach the Base:** Place the main air cooler unit upside down on a soft, clean surface. Align the base support with the bottom of the unit and secure it firmly. Refer to the diagram for correct alignment.

Image 2: Technical diagram illustrating the assembly of the air cooler, including attaching the base and indicating dimensions and features.

- 3. Position the Unit:** Place the assembled air cooler on a flat, stable surface.
- 4. Fill Water Tank:** Open the water tank cover (usually located at the back or bottom of the unit). Fill the tank with clean, cold water up to the "MAX" level indicator. Do not overfill.

Note: The water tank is not removable. To fill, carefully pour water into the designated opening.

5. **Insert Ice Boxes:** For enhanced cooling, place the provided ice boxes (after freezing them) into the water tank. Ensure they are fully submerged.
6. **Connect Power:** Plug the power cord into a suitable electrical outlet.

4. OPERATING INSTRUCTIONS

The G3 Ferrari G50052 Cool Master can be operated using the control panel on the unit or the remote control.

Control Panel & Remote Functions:

- **Power (ON/OFF):** Press to turn the unit on or off.
- **Speed:** Press to cycle through the 12 available fan speeds. The current speed will be displayed.
- **Timer:** Press to set the operating timer. You can set it for up to 12 hours. Each press increases the timer by one hour.
- **Swing:** Activates or deactivates the automatic horizontal oscillation function, distributing air across a wider area.
- **Cooling:** Engages the evaporative cooling function. This uses water from the tank to cool and humidify the air.
- **Light:** Turns the courtesy light on or off.
- **Ion Function:** This function purifies the air by releasing ions.

The digital display will show the current settings, such as temperature, speed, or timer remaining.

5. MAINTENANCE AND CLEANING

Regular maintenance ensures optimal performance and extends the lifespan of your air cooler. Always unplug the unit before cleaning or performing any maintenance.

Cleaning the Exterior:

- Wipe the exterior surfaces with a soft, damp cloth.
- Do not use abrasive cleaners, waxes, or solvents as these may damage the finish.
- Ensure no water enters the control panel or other electrical components.

Water Tank Maintenance:

- **Emptying the Tank:** It is recommended to empty the water tank regularly, especially if the unit will not be used for an extended period, to prevent stagnant water and mold growth. Since the tank is not removable, carefully tilt the entire unit over a sink or drain to empty the water.
- **Cleaning the Tank:** Periodically clean the inside of the water tank with a mild detergent and water. Rinse thoroughly to remove any residue.
- **Filter Cleaning:** The evaporative filter (cooling pad) should be cleaned regularly. Refer to the specific instructions in the full manual for accessing and cleaning the filter. Typically, this involves rinsing under running water.

Storage:

When storing the unit, ensure the water tank is completely empty and dry. Store in a cool, dry place, preferably in its original packaging.

6. TROUBLESHOOTING

If you encounter any issues with your G3 Ferrari G50052 Cool Master, please refer to the following common problems and solutions before contacting customer support.

Problem	Possible Cause	Solution
---------	----------------	----------

Problem	Possible Cause	Solution
Unit does not turn on.	No power supply. Power button not pressed.	Check if the power cord is securely plugged into a working outlet. Press the Power button on the unit or remote control.
No cooling effect.	Water tank is empty. Cooling function not activated. Ice boxes not used or melted.	Fill the water tank with water. Press the "Cooling" button. Ensure ice boxes are frozen and placed in the tank.
Weak airflow.	Low fan speed setting. Air inlets/outlets blocked.	Increase the fan speed using the "Speed" button. Ensure there are no obstructions around the unit.
Unpleasant odor.	Stagnant water in the tank. Dirty filter.	Empty and clean the water tank thoroughly. Clean or replace the evaporative filter.
Remote control not working.	Dead batteries. Obstruction between remote and unit.	Replace batteries in the remote control. Ensure a clear line of sight to the unit's receiver.
